February 1, 1991

Mr. Kenneth Fong
6305 Meadow Sweet Way
Las Vegas, NV 89108

RE: Lewis Homes; Rainbow Vista No. 10
Phase 8, Lot 609, Block F

Dear Mr. Fong,

It was my pleasure to meet with you and your Father.

As per our discussion, Lewis Homes will relocate the portion of the northwest and the northeast block walls that are located approximately 6" inside of the property lines to the legal property lines. We will make arrangements with our block wall subcontractor to move the walls as soon as it can be scheduled.

Also, as a courtesy to you and at your request, we will remove the northeast return wall and install a wrought iron gate.

All of the above will take place after the close of escrow to accommodate your move-in plans. Work will be completed by February 28, 1991, unless there is an act of God, labor strike or a material shortage which prevents completion.

As a part of escrow, and upon relocation of the block walls, Lewis Homes requires that you expressly release, discharge and hold harmless Lewis Homes of Nevada, as well as its partners, any other business entities in which said partners have an interest and all affiliates, of any additional claims, warranty work and all claims, demands, and causes of action that you ever had, now have, or may have in the future created by or arising out of the matter herein described.

If you understand and are in agreement with all of the above, please indicate by signing below.

Very Truly Yours,

LEWIS HOMES OF NEVADA

Leah S. W. Bryant

OTHER INSPECTIONS AND FEES

1. Inspections outside of normal business hours = \$30.00 per hour (minimum charge three hours).
2. Re-inspection fee during normal business hours assessed under provisions of TABLE 3-A of the Uniform Building Code = \$30.00 per hour.
3. Inspections during normal business hours for which no fee is specifically indicated = \$30.00 per hour (minimum charge one half hour).
4. Additional plan review required by changes, additions, or revisions to approved plans = \$30.00 per hour (minimum charge two hours).

CONDITIONS OF THE PERMIT:

1. I agree to call the City Building Department for inspections before concrete is poured, before rough wiring, electrical, plumbing, framing is covered. Also for air conditioning, drywall and sheathing inspection.
2. I agree that when the job is completed that I will call for final inspection before occupancy.
3. I agree to perform all construction in accordance with City Ordinances and Building Codes.
4. The Contractor's signature below denotes authority from the owner to sign in his behalf and that the owner is aware of all requirements of this application and permit. Separate permits must be taken out for work outlined above this agreement.
5. I have read and understand the contents of this application and permit; I hereby state that the information I have supplied on this application is true and correct.
6. Approval for the work under this permit will be given only after refuse and debris have been removed from job site and public right of way.
7. 24 HOUR MINIMUM NOTICE REQUIRED FOR INSPECTIONS.

ENGINEER

Approval for the work under this permit will be given only after refuse
and debris have been removed from job site and public right of way.

DESCRIPTION	TOTAL LIN. FT.	TOTAL SQ. FT.
CHAIN LINK OR WIRE MESH		
ORNAMENTAL IRON		
WOOD		
MASONRY		
RETAINING	<u>28" 55</u>	<u>146</u>

OTHER INSPECTIONS AND FEES

1. Inspections outside of normal business hours = \$30.00 per hour (minimum charge three hours).
2. Re-inspection fee during normal business hours assessed under provisions of TABLE 3-A of the Uniform Building Code = \$30.00 each.
3. Inspections during normal business hours for which no fee is specifically indicated = \$30.00 per hour (minimum charge one half hour).
4. Additional plan review required by changes, additions or revisions at approved plans = \$30.00 per hour (minimum charge two hours).

CONDITIONS OF THE PERMIT:

1. Any type of retaining wall must be engineered by a Civil or Structural Engineer.
2. If a home owner takes out the Building Permit and if the owner sublets the work to a Contractor, then the Contractor must take out the permit and pay for it.
3. No fence or wall can be built on City property or rights-of-way, but this is not intended to preclude construction within utility easements if utilities will not be damaged or made inaccessible.
4. The fence or wall shall not enclose any water meter, light standard, or fire alarm box and shall not come closer than 24" from the nearest fire hydrant outlet.
5. Department Inspectors must approve footings before concrete is poured and block wall reinforcing before grouting is done.
6. Maximum height of any wall or fence is 6' side and rear yards; 4' maximum in front yard with the vertical surface above the height of 2' - 50% open.
7. I must not obstruct required onsite parking space (2 spaces for each dwelling unit) by the erection of this fence or wall.
8. By the signing of this application I herewith agree to the requirements outlined above.

FOR INSPECTIONS, CALL 799-2071

SIGNED

CONTRACTOR - AGENT - OWNER

PLANNING DEPT.

I hereby certify that I have reviewed this application and the proposed plans and have found that the proposed development meets the requirements of the City of Las Vegas Flood Hazard Reduction Ordinance for the issuance of this Development Permit.

CITY OF LAS VEGAS
DEPARTMENT of
BUILDING & CONSTRUCTION

(g) Special Purpose Roofs. 1. Wood shakes and shingles with asbestos felt and application requirements of this chapter except that asbestos felt is to be substituted for the asphalt felt specified in Section 3203 (d) 3 H. The deck shall be constructed of 5/8-inch plywood with exterior glue or 1-inch nominal tongue and groove boards overlaid with a layer of approved asbestos felt lapped 2 inches on the horizontal and vertical joints. An 18-inch-wide strip of the same asbestos felt shall be shingled in between each course of shakes in such manner that no felt is exposed to the weather below the shake butts.

B. Wood shingles. Special purpose wood shingle roofing shall conform to the grading and application requirements of this chapter. In addition, the deck, whether of spaced boards or solid, shall be overlaid with a layer of approved asbestos felt lapped 2 inches on the horizontal and vertical joints.

C. Asbestos felt. Approved asbestos felt for special purpose roofing shall weigh not less than 12 pounds per 100 square feet, be not less than .022 inch in thickness, nonbituminous saturated, containing a fire- and water-retardant binder, and be reinforced with glass fibers running lengthwise of the sheet not more than 1/4 inch apart.

2. Wood Shakes or shingles with gypsum board underlayment. Special purpose wood shake or wood shingle roofing shall conform to the grading and application requirements of this chapter. In addition, an underlayment of 1/2-inch Type X gypsum board shall be placed under the solid or spaced sheathing.

(h) Slope of Roof. Roof covering materials shall be installed as set forth in Table No. 32-B except as follows:

EXCEPTIONS: 1. In addition to the application requirements of Table No. 32-B, built-up roofing on slopes greater than 1 inch in 12 inches for gravel surface or 2 inches in 12 inches for smooth or cap sheet surface shall be blind nailed through tin caps into the deck, wood nailers or wood insulation stops at not more than 18 inches on center to secure all underlying plies.

Built-up roofing on slopes exceeding 3 inches in 12 inches shall be installed with plies laid parallel to the slope of the deck, and the surfacing material shall be other than gravel or slag.

2. Asphalt shingles laid with double coverage may be installed on slopes as low as 2 inches in 12 inches, provided the shingles are approved self-sealing or are hand-sealed and are installed with an underlayment consisting of two layers of Type 15 felt applied shingle fashion.

3. Asbestos cement shingles may be installed on slopes as low as 3 inches in 12 inches where the underlayment consists of two layers of Type 15 asbestos felt applied shingle fashion.

4. Wood shakes may be installed on a slope not less than 3 inches in 12 inches when installed over an underlayment of not less than Type 15 felt and when approved by the building official.

5. Interlocking roof tiles may be installed on slopes below 3 inches in 12 inches where underlayment consists of two layers of Type 15 felt or heavier applied shingle fashion and solid-mopped together with approved cementing material between the plies.

Insulation

3204. The use of combustible roof insulation shall be permitted, provided it is covered with approved roof covering applied directly thereto. For foam insulation, see Section 1712.

Insulation shall be of a rigid type suitable for application of a roof covering.

Where fire-retardant roof coverings are required, insulations shall be a type approved for the type of deck and the built-up roofing applied.

Where built-up roofing is to be applied, vapor barriers shall be installed between the deck and the insulation where the average January temperature is below 45°F or where excessive moisture conditions are anticipated within the building.

Access, Draft Stops and Ventilation

3205. (a) Access. An attic access opening shall be provided in the ceiling of the top floor of buildings with combustible ceiling or roof construction. The opening shall be located in a corridor or hallway of buildings of three or more stories in height and readily accessible in buildings of any height.

The opening shall be not less than 22 inches by 30 inches.

Thirty-inch minimum clear head room shall be provided above the access opening.

Attics with a maximum vertical clear height of less than 30 inches need not be provided with access openings.

(b) Draft Stops. Attics, mansards, overhangs and other concealed roof spaces formed of combustible construction shall be draft stopped as specified in Section 2516 (f).

(c) Ventilation. Where determined necessary by the building official due to atmospheric or climatic conditions, enclosed attics and enclosed rafter spaces formed where ceilings are applied direct to the underside of roof rafters shall have cross ventilation for each separate space by ventilating openings protected against the entrance of rain and snow. The net free ventilating area shall be not less than 1/50 of the area of the space ventilated, except that the area may be 1/300, provided at least 50 percent of the required ventilating area is provided by ventilators located in the upper portion of the space to be ventilated at least 3 feet above eave or cornice vents with the balance of the required ventilation provided by eave or cornice vents. The openings shall be covered with corrosion-resistant metal mesh with mesh openings of 1/4 inch in dimension.

Smoke and Heat Venting

Sec. 3206. (a) When Required. Smoke and heat vents shall be installed in accordance with the provisions of this section as follows:

1. In single-story Group B, Divisions 2 and 4 Occupancies having over 50,000 square feet in undivided area.

EXCEPTIONS: 1. Office buildings and retail sales areas.

2. Group B, Division 4 Occupancies used for bulk frozen food storage when the building is protected by a complete automatic sprinkler system.
