OTHER INSPECTIONS AND FEES

- 1 Inspections outside of normal business hours = \$30.00 per hour (minimum charge three hours)
- 2 Re inspection fee during normal business hours assessed under provisions of TABLE 3 A of the Uniform Building Code = \$30.00 each
- 3 Inspections during normal business hours for which no fee is specifically indicated = \$30.00 per hour (minimum charge one half hour)
- 4 Additional plan review required by changes additions or revisions to approved plans = \$30.00 per hour (minimum charge two hours)

FOR INSPECTIONS CALL 799 2071

CONDITIONS OF THE PERMIT

- 1 I agree to call the City Building Department for inspections before concrete is poured before rough wiring electrical plumbing framing is covered Also for air conditioning drywall and sheathing inspection
- 2 I agree that when the job is completed that I will call for final inspection before occupancy
- 3 I agree to perform all construction in accordance with City Ordinances and Building Codes
- 4 The Contractor's signature below denotes authority from the owner to sign in his behalf and that the owner is aware of all requirements of this application and permit Separate permits must be taken out for work outlined above this agreement
- 5 I have read and understand the contents of this application and permit I hereby state that the information I have supplied on this application is true and correct

Approval for the work under this permit will be given only after refuse and debris have been removed from job site and public right of way

Re Mountain Diagnostics Center

Gentlemen

This is to report the results of tests and observations performed by our company in conjunction with preparation of the building pad of the Mountain Diagnostic Center. The purpose of our observations and tests was to determine compliance with the geotechnical investigation prepared by our organization dated July, 1990.

Building pad construction consisted of importing 15 feet of structural fill to bring building pad to grade. And in addition, over excavating two feet beneath the bottom of footings, watering and compacting natural ground surface, placing and compacting structural fill (as necessary) over the prepared area. In the area of the MRI, the natural soils were over excavated seven feet in depth and twice the width and replaced with structural fill. The fill materials were derived from imported soils consisting of sandy gravel.

Field density tests were performed in conjunction with the earthwork to determine the relative compaction achieved. The results of these tests are tabulated on the attached data sheets.

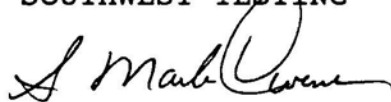

Based upon the results of field and laboratory tests, on observations of the grading procedures, and on experience, it is our opinion that the grading contractor has complied with the recommendations presented in the geotechnical investigation report. And further grading which would affect the building pad should be performed with observation and testing.

Mr John Carson
August 7, 1990

APPELLANT'S NAME Sunbelt Contractors	APPELLANT'S ADDRESS 3280 W Hacienda, #211	ZIP CODE 89118
APPELLANT'S RELATIONSHIP TO PROJECT General Contractors		PHONE (702) 798-1942

Appeal is hereby made to the Building Official for a variance from or interpretation of Section 504
of the City of Las Vegas Building Code which requires that

Not permitted less than five feet (5')
Protected less than twenty feet (20')

Explanation of why conformance with the above requirement on this project presents an unusual problem
(Use attachment if necessary)

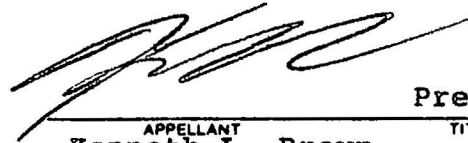

Existing two story building has four (4) window units, two (2) on the first floor and two (2) on the second floor, 96 square feet each, set back seven (7') feet from proposed carport

State specifically what is proposed in lieu of literal compliance

Install carport five feet (5') from the building and seven feet (7') from the glazed openings

CONTRACTOR'S MATERIAL & TEST CERTIFICATE FOR UNDERGROUND PIPING

PROCEDURE

Upon completion of work inspection and tests shall be made by the contractor's representative and witnessed by an owner's representative. All defects shall be corrected and a system left in service before contractor's personnel finally leave the job.

A certificate shall be filled out and signed by both representatives. Copies shall be prepared for approving authorities, owners and contractor. It is understood the owner's representative's signature in no way prejudices any claim against contractor for faulty material, poor workmanship or failure to comply with approving authority's requirements or local ordinances.

TEST DESCRIPTION

FLUSHING Flow the required rate until water is clear as indicated by no collection of foreign material in burlap bags at outlets such as hydrants and blow-offs. Flush at flows not less than 400 GPM (1514 L/min) for 4 inch pipe, 600 GPM (2271 L/min) for 6 inch pipe, 700 GPM (2639 L/min) for 8 inch pipe, 1000 GPM (3785 L/min) for 10 inch pipe, 1200 GPM (4518 L/min) for 12 inch pipe and 2000 GPM (7580 L/min) for 16 inch pipe. When supply cannot produce stipulated flow rates obtain maximum available flow.

HYDROSTATIC Hydrostatic tests shall be made at not less than 200 psi (13.8 bars) for two hours or 50 psi (3.4 bars) for 24 hours.

LEAKAGE New pipe and with rubber gasketed joints shall be satisfactory having no leakage at the joints. If leakage occurs at the joints shall not exceed 2 drops per hour (1.69 L/h) per 10 joints respectively of pipe diameter. The leakage shall be considered unsatisfactory and necessary repairs made. The amount of allowable leakage specified above may be increased by 1 fl oz per in. valve diameter per hour (30.48 mm³/h) for each metal seated valve solenoiding the test section. If dry barrel hydrants are tested with the main valve open so the hydrants are under pressure an additional 5 oz per minute (150 mL/min) leakage is permitted for each hydrant.
