December 19 1991

John E. Tucker Director
Department of Building and Safety
400 East Stewart Avenue
Las Vegas Nevada 89101

re Valley Hospital Tower Addition
Log No. C91 91
Sewer Connection Fees Reference Appeal 12/17/91

Dear Mr. Tucker

As authorized agent for Universal Health Services 367 S. Gulph Road King of Prussia PA 19406 on this matter please be advised of the following

Universal Health Services is aware that sewer fees are not required on this Project because the licensed bed count will remain at 310 patients. Additionally, should the number of licensed beds be increased in the future, Universal Health Services is aware that sewer fees for the additional beds will be due at that time and at the connection rate in effect at that time.

Thank you for your cooperation in this matter.

Sincerely

Tim Massanari

Attention Mr Dave Semenza

RE Comm No 07-90100
Valley Hospital
Endoscopy Suite

Gentlemen

As per our telephone conversation, the following is the information you requested pertaining to the emergency system for the referenced project

The renovation work for the Endoscopy Suite is within an area of the hospital which does not have separation of the emergency system into branches. Due to the minimal amount of emergency power required, we connected lighting and receptacles in this area to the existing emergency panel serving this area. This panel is indicated as panel 'EA' on the drawings. Panel 'EA' currently serves existing emergency lighting and receptacles for the first floor in this area.

To obtain the branch separation as indicated in the NEC, we would have to route our circuits a considerable distance outside this area. This would prove to be costly and also confusing to the maintenance personnel in charge of maintaining the hospital's electrical system.

Please review this situation, and advise us if the drawings are acceptable as indicated or if you will require changes to provide branch separation.

If you have any questions or comments, please do not hesitate to call.

Yours truly,

DUNHAM ASSOCIATES, INC

David L. Magdefrau

Started another pressure test on underground line at 1250 p.m. Pressure readings of 154 psi at 74° found.

Recheck of system will be tomorrow at approximately this same time

All leaks have now been repaired

Received a copy of purge test performed by Western Medical Gas Services of Carlsbad, California.

Inspected liquid oxygen line for pressure.
Found 140 psi at 60°. Per code system
must be leak free for 24 hours. System
has lost pressure in lines so system
must be rejected at this time.

Search for leaks and repair
Call for another inspection when problems
corrected.

BOILER OPERATORS CERTIFICATE

A boiler operators certificate is not mandatory in the State of Nevada. However, boiler operator certificates are given after successfully completing an examination. Examinations are given for the different classes of boilers requiring attendance.

LOCAL CODES

It is also very important that the additional standards established by local city or county codes be fully complied with, including

- 1 Boiler Installation Permits
- 2 Boiler room requirements
- 3 Permits and requirements on utilities, including gas, electrical, water vent and plumbing conditions
- 4 All conditions to the particular installation must meet with the approval of the concerned inspection jurisdiction

IMPORTANT NOTICE ON BOILERS INSTALLED IN THE STATE OF NEVADA

REQUIREMENTS FOR INSTALLATION APPLICATION AND BOILER OPERATING PERMIT

The Nevada regulations are mandatory and applicable on the following boilers and pressure vessels

1 All steam boilers and hot water heating and supply boilers in excess of 200,000 btu heating capacity

2 All unfired pressure vessels exceeding 15 psig, 120 gallon capacity or 5 cubic feet in size

BEFORE INSTALLING A BOILER OR PRESSURE VESSEL

1 An Application for Installation must be filed with the Mechanical Section of the Nevada Division of Occupational Safety and Health

2 A copy of the Manufacturer's Data Report must accompany the application

BEFORE PLACING A BOILER OR PRESSURE VESSEL IN SERVICE

1 An operating permit must be obtained or temporary approval received from the inspection jurisdiction until the permit is acted upon

2 The inspection and permit to operate must be handled by a Nevada State Inspector or a Nevada commissioned inspector employed by an insurance company and authorized by Mechanical Section

NEVADA REGULATION NO 618 298 - SUPERVISION OF BOILERS

1 A steam boiler in an occupied building or a hot water boiler operated at temperatures exceeding 250° F which has safety valves set at pressures in excess of 15 pounds per square inch for a steam power boiler or 160 pounds per square inch for a hot water boiler must not be operated unattended for periods in excess of time required to evaporate the water at normal operating level to the lowest permissible level of water when the feed water is shut off and the boiler is forced to its maximum capacity

2 When the boiler is required to be attended the boiler must be in the charge of a person qualified by technical training experience and knowledge to start operate and shut down the boiler

3 The attendant shall personally check the operation of the boiler the necessary auxiliaries and the level of water in the boiler at intervals necessary to ensure the safe operation of the boiler The boiler and its auxiliaries must be checked at least every 60 minutes If attendance is required a time clock or other device to automatically start or stop the operation of the boiler must not be used

4 Steam boilers and power boilers which have safety valves set at a pressure more than 15 pounds per square inch must be attended at all times unless the boiler is equipped with the following protective devices

(a) A cutoff for low water or low fuel or if the boiler is operated at a supercritical pressure a cutoff for high temperature or fuel

(b) An automatic feed regulator

(c) Fuel and damper regulators including safety pilots for gas fuels and controls for safe combustion for liquid fuels

(d) An audible alarm to indicate low water or if the boiler is operated at a supercritical pressure an audible alarm to indicate high temperature and

(e) A pressure control
