INSPECTION REQUESTED					
Meet with Senior Inspector Joe Hurst to check the grease trap. The grease trap has not been set level going East to West. The rain water may have caused the grease trap to settle. The grease trap must be set level, then inspected and immediately after be compacted and back filled and finally paved. Coordinate the installation of the water line at R" below grade so the grease trap can be immediately backfilled and paved so the rain water will not cause it to settle.

INSPECTION REQUESTED		450 grease trap		
the drain line to the grease trap is ok 450 grease trap is approved the sewer line from the discharge side of the grease trap must be checked for grade It appears the building sewer line may have been compacted by the rain water and Big trucks causing it to grade in the wrong direction The sewer line will be rechecked when the pvc water line is relocated 12" below grade
