Thermal Performance—Attic Blowing Application

- In accordance with the chart below, you must install the specific number of bags per 1,000 sq. ft. of net area for each R-Value listed.
- The maximum net coverage per sq. ft. must not exceed that specified for each R-Value.
- The installed insulation must be at or above the specified minimum thickness for each R-Value.
- Failure to install the required minimum weight per sq. ft. of insulation at or above the minimum thickness will result in reduced R-Value.
- This product should not be mixed with other blown insulations or the thermal claims will become invalid.

"R" means resistance to heat flow. The higher the R-Value, the greater the insulation power. To get the marked R-Value, it is essential that this insulation be installed properly. If you do-it-yourself, get instructions and follow them carefully. Instructions do not come with this package.

CAUTION: RECESSED LIGHT FIXTURES—TO PREVENT OVERHEATING, DO NOT INSULATE ON TOP OR WITHIN 3" OF SUCH DEVICES. DOES NOT APPLY TO TYPE IC LIGHT FIXTURES.
