Thermal Performance — Attic Blowing Application

- In accordance with the chart below you must install the minimum number of bags per 1 000 sq ft of net area for each R Value listed
- The maximum net coverage must not exceed that specified for each R Value
- The installed insulation must be at or above the specified minimum thickness for each R Value
- Failure to install the required minimum weight per sq ft of insulation at or above the minimum thickness will result in reduced R Value
- This product should not be mixed with other blown insulations or the thermal claims will become invalid

R means resistance to heat flow. The higher the R Value the greater the insulation power. To get the marked R Value it is essential that this insulation be installed properly. If you do it yourself get instructions and follow them carefully. Instructions do not come with this package.

CAUTION RECESSED LIGHT FIXTURES—TO PREVENT OVERHEATING DO NOT INSULATE ON TOP OR WITHIN 3" OF SUCH DEVICES. DOES NOT APPLY TO TYPE IC LIGHT FIXTURES OR TO FLUORESCENT FIXTURES WITH THERMALLY PROTECTED BALLASTS

To compensate for framing members the number of bags per 1000 sq ft of net area should be reduced as follows:
