RE: Waste footings poured prior to inspection

Dear Sir:

It has come to our attention that there had been concrete poured by MS Concrete prior to an inspection. The lots have the physical address of:

4820 Fiesta Lakes  
4844 Fiesta Lakes  
4856 Fiesta Lakes

MS Concrete poured the waste footings on these homes in conjunction with homes in the area that had already been inspected and were ready to receive concrete. MS Concrete will therefore accept the responsibility for the waste footing of these homes and we certify that they have been constructed as per City of Las Vegas standards, and under the specifications on the approved plans for this project.

If we can assist in any other way, or provide any other information, please contact our office.

Thank you,

*John P. Crampton*
