23701 NOTE:

1. The first step in the process of the investigation is to identify the problem. This is done by the investigator who is assigned to the case. The investigator will then conduct a preliminary investigation to determine the scope of the problem. This may involve interviewing witnesses, reviewing documents, and conducting a physical inspection of the scene.

2. The next step is to gather evidence. This is done by the investigator who is assigned to the case. The investigator will then conduct a thorough investigation to determine the facts of the case. This may involve interviewing witnesses, reviewing documents, and conducting a physical inspection of the scene.

3. The third step is to analyze the evidence. This is done by the investigator who is assigned to the case. The investigator will then conduct a thorough investigation to determine the facts of the case. This may involve interviewing witnesses, reviewing documents, and conducting a physical inspection of the scene.

4. The fourth step is to prepare a report. This is done by the investigator who is assigned to the case. The investigator will then conduct a thorough investigation to determine the facts of the case. This may involve interviewing witnesses, reviewing documents, and conducting a physical inspection of the scene.

5. The fifth step is to present the report. This is done by the investigator who is assigned to the case. The investigator will then conduct a thorough investigation to determine the facts of the case. This may involve interviewing witnesses, reviewing documents, and conducting a physical inspection of the scene.

6. The sixth step is to follow up. This is done by the investigator who is assigned to the case. The investigator will then conduct a thorough investigation to determine the facts of the case. This may involve interviewing witnesses, reviewing documents, and conducting a physical inspection of the scene.

7. The seventh step is to close the case. This is done by the investigator who is assigned to the case. The investigator will then conduct a thorough investigation to determine the facts of the case. This may involve interviewing witnesses, reviewing documents, and conducting a physical inspection of the scene.

8. The eighth step is to review the case. This is done by the investigator who is assigned to the case. The investigator will then conduct a thorough investigation to determine the facts of the case. This may involve interviewing witnesses, reviewing documents, and conducting a physical inspection of the scene.

9. The ninth step is to archive the case. This is done by the investigator who is assigned to the case. The investigator will then conduct a thorough investigation to determine the facts of the case. This may involve interviewing witnesses, reviewing documents, and conducting a physical inspection of the scene.

10. The tenth step is to evaluate the case. This is done by the investigator who is assigned to the case. The investigator will then conduct a thorough investigation to determine the facts of the case. This may involve interviewing witnesses, reviewing documents, and conducting a physical inspection of the scene.
