

POLEcat™

Providing 24 Hour Power on Gang Switched Light Poles

POLEcat™ DESCRIPTION:

The POLEcat™ is a new product designed to mount easily on a gang switched light pole and provide day and night power for electronic equipment such as wireless hotspots, backhauls, and cameras. How many times have your plans been changed or your budget busted because the light pole you need has night power only. And more often than not, the primary switching light pole is already populated with competing equipment, or simply in the wrong location to meet your needs. Now you have a new option.

HOW DOES THE POLEcat WORK ?

The POLEcat™ is a compact pole mount unit that charges at night and provides power all day long for electronic equipment mounted on light poles. It uses gentle fast charge technology called Cheetah Charge™. Cheetah Charge™ rapidly charges an extremely compact high capacity battery bank in less than 7 hours, and provides continuous AC and DC power 24 hours a day, all in a compact and affordable package.

WHO USES THE POLEcat™ ?

- Wireless system integrators and providers
- Camera and security system integrators.
- Traffic signal integrators.
- Municipalities and Agencies.

WHY USE THE POLEcat™ ?

- It can cost less than a dedicated circuit installation.
- It's much smaller than a solar power system.
- It is a fast and easy to install.
- It's easy to relocate.
- Great for permanent or temporary applications.
- No special contractors are required for installation.

Quickly retrofit any gang switched light pole with 24 hour a day AC and/or DC power using our compact POLEcat power system.
