Attn: Joe Lopardo

Subject: Pavilion Middle School Project 1501
Provision of On-Site Fire Lane

As agreed in the meeting held at the subject project site held October 19, 1999, commencing November 15, 1999, CCSD will grade and maintain a smooth driving surface for fire department vehicles around the subject project site. This route/fire lane will begin at the south entrance to the project and continue around the project, very similar to the fire lane shown on the approved site drawing, and terminate at the north entrance to the project. CCSD will maintain this route/fire lane through the duration of the project, or until such time as the permanent facilities are complete. Should you have any questions please contact me.

Sincerely,

Timothy Kusz, Contract Monitor,

re: **PAVILLION MIDDLE SCHOOL PROJECT 1501 - ON SITE FIRE LANE**

Dear Tim,

I am in receipt of your letter, dated October 19, 1999, in which you state that the Clark County School District will maintain a graded driving surface for fire department access around the project. According to your letter, this road will be available for fire department use commencing on November 15, 1999.

This plan will be acceptable to the fire department as long as the road is maintained clear of all obstructions (including vehicle parking), in good repair and provided with an all weather driving surface should we have unexpected weather during this time. Your general contractor has stated that a "type 2" road base surface will immediately be provided to the road in event of unforeseen weather. Should this agreement not be complied with, immediate action will be required to provide a permanent all weather roadway around the project.

If you have any further questions please contact me at 429-3799.

Sincerely,

Joe Lopardo
Inspection Supervisor
