SUBJECT: Off site improvements

DESCRIPTION

We believe the following record to be an accurate summary of decisions and related discussions. We will appreciate notification of exceptions to this record within (10) days of its receipt. Failing such notification, we will consider this a statement of fact in which you concur.

Mr. Snyder was asked if the Roche Construction had completed their responsibility as far as the flashing beacons are concerned. Mr. Snyder indicated the following were still incomplete:

1. Crash caps have not been installed at the flasher pole bases.
2. There is a section of sidewalk on the east side of Lamb Boulevard that has not been replaced where underground conduit has been installed.

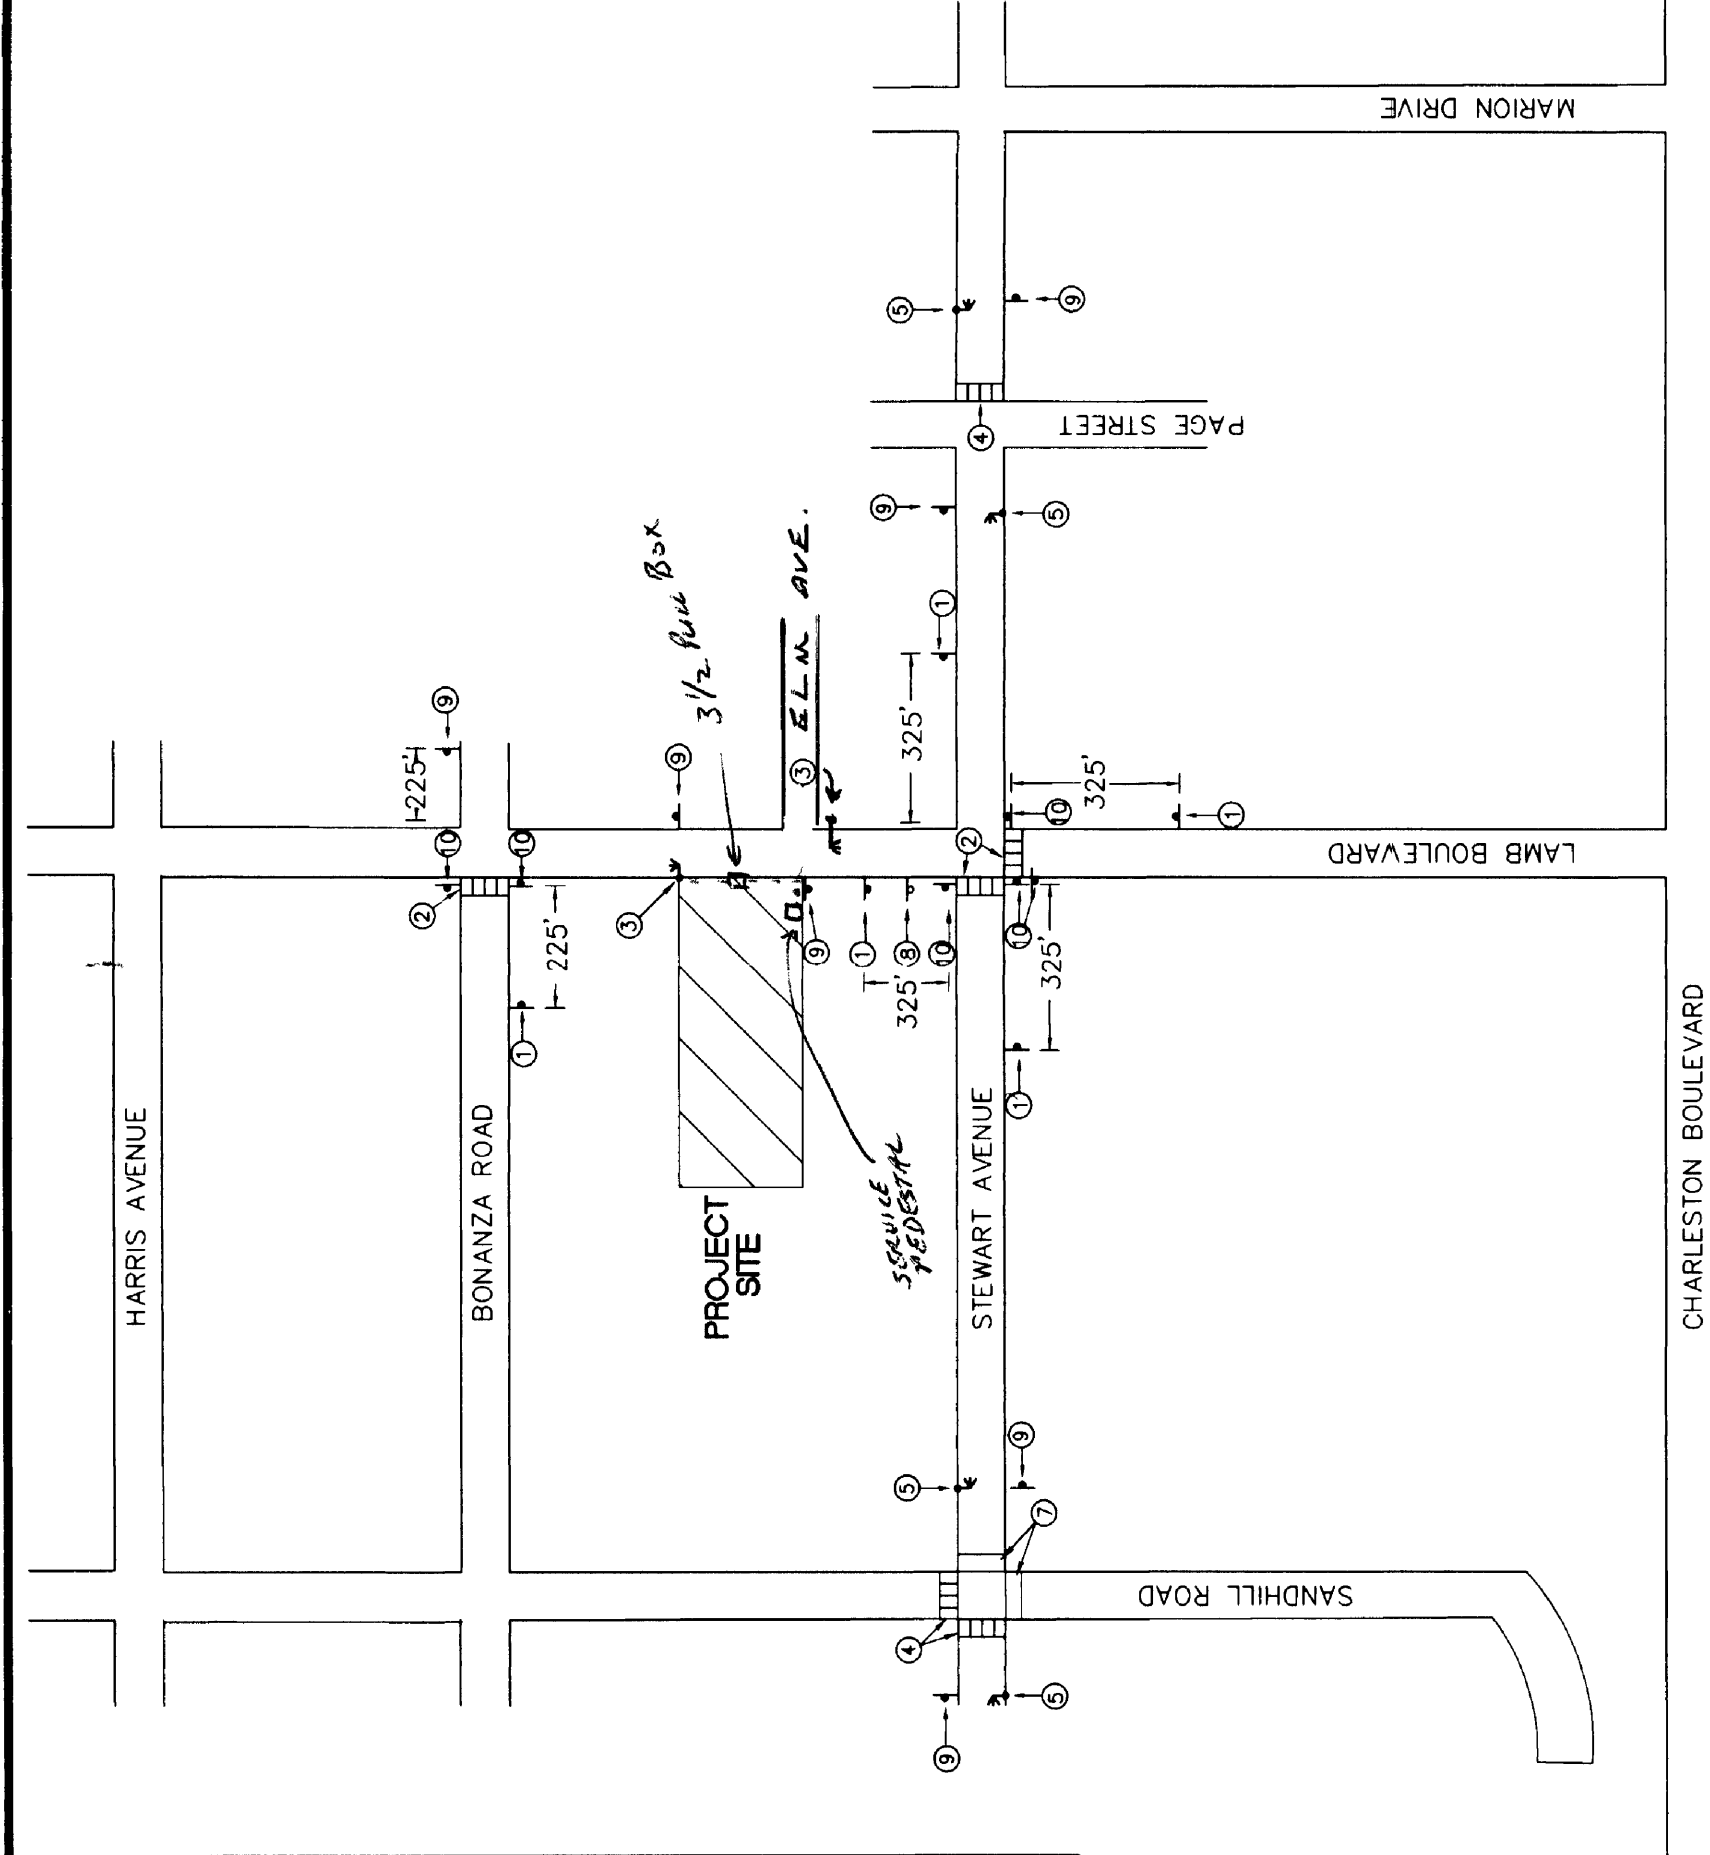

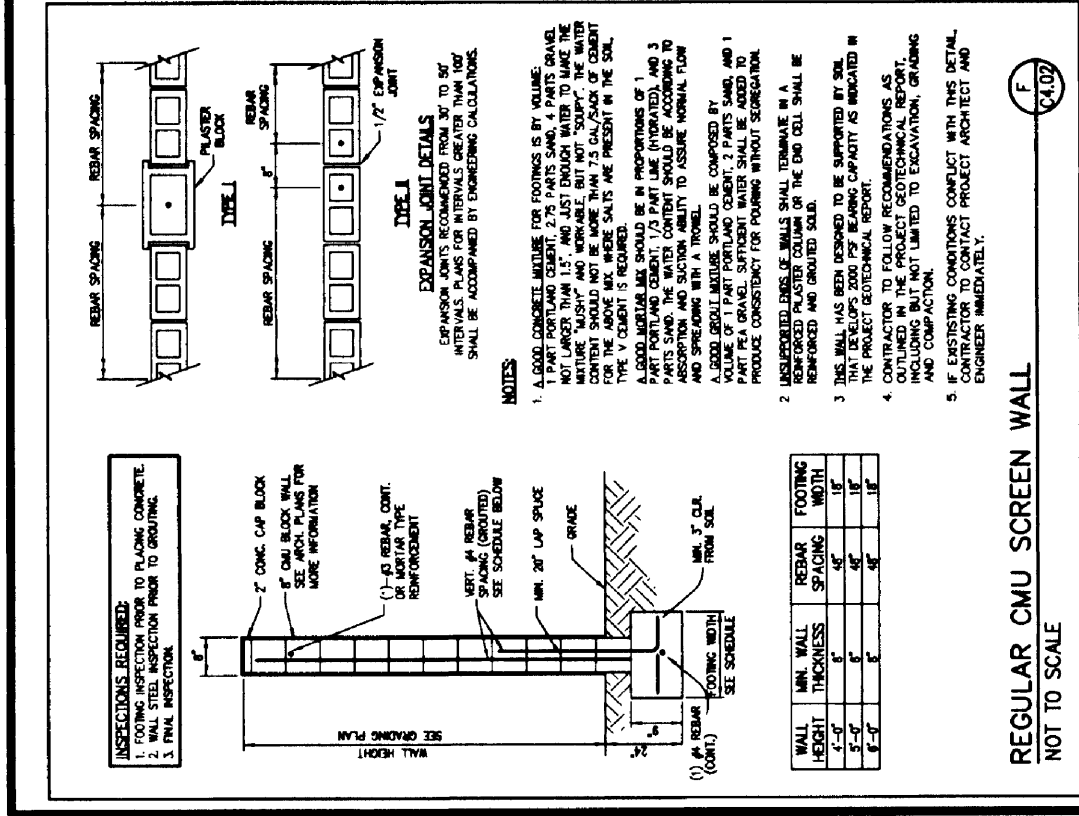

3. The power service pedestal for the flashers has not been energized. It is required that NPCo receive a request from the CLV to energize the pedestal. The CLV must receive a request for inspection from Roche prior to requesting service from NPCo. Mr. Snyder also noted the wire from the transformer to the service pedestal must be installed by Roche (Vita). Roche should contact Manny Windhorst (375-6197) to schedule inspection.
