TEMPORARY COMMERCIAL PERMIT
TEMPORARY CONTRACTORS CONSTRUCTION YARD
TCP-18661

Valid January 03, 2007 To December 03, 2007

Description of Event: TCP to allow a temporary contractors construction yard at the northeast corner of Alta Drive and Rampart Blvd from January 3, 2007 through December 3, 2007. Construction activity will end at 3:00 PM.

Applicant: Greater Nevada Paving
shawn gustafson
4040 Frehner Rd
Las Vegas, NV 89030
(702)232-1918 x

Parcel(s): 138-32-601-003
Ward(s): WARD 2 (STEVE WOLFSON)

THIS PERMIT IS APPROVED PURSUANT TO SECTION 19.18.100 OF THE LAS VEGAS MUNICIPAL CODE, SUBJECT TO THE FOLLOWING CONDITIONS:

See page 2 for conditions

THIS TEMPORARY COMMERCIAL PERMIT IS NOT VALID UNTIL THE FOLLOWING DEPARTMENT APPROVALS / PERMITS / LICENSES HAVE BEEN OBTAINED:

☐ FIRE _____ (Initials)

☐ BUSINESS SERVICES _____ (Initials)

☐ SEWER _____ (Initials)

☐ TRAFFIC _____ (Initials)

THIS PERMIT SHALL BE POSTED IN A CONSPICUOUS PLACE

TEMPORARY COMMERCIAL PERMIT
TEMPORARY CONTRACTORS CONSTRUCTION YARD
TCP-18661

Valid January 03, 2007 To December 03, 2007

NOT TO EXTEND PAST 3:00 P.M.

1. BUSINESS HOURS SHALL BE FROM _____ TO _____
2. THIS PERMIT IS NOT A BUSINESS LICENSE.
3. THIS PERMIT IS NOT A SUBSTITUTE FOR ANY REQUIRED STATE OR LOCAL BUSINESS LICENSE OR FOR ANY REQUIRED CHARITABLE SOLICITATION PERMIT.
4. This use shall not create a nuisance to nearby properties as a result of factors such as excessive illumination, glare, noise, vibration, smoke, dust, dirt, odors, gases or heat.
5. The use shall conform to the submitted plot plan date stamped 12-13-06
6. No combustible materials shall be located within 50 feet of any structure on, or adjacent to this site.
7. No building or structure of any type shall be erected closer than 25 feet from any property line.
8. The applicant shall display a copy of this Temporary Commercial Permit during the hours of operation.
9. Sanitation facilities must be provided in accordance with the Clark County Health District and Republic Services of Southern Nevada.
10. The applicant shall provide private security officers as required by the Las Vegas Metropolitan Police Department.
11. Any signage for this temporary commercial use must be approved and permitted by the Planning and Development Department.
12. All applicable City code requirements shall be satisfied.
13. The applicant shall be responsible for leaving the site free of debris, litter or any other evidence of occupancy upon completion or removal of the use.

Attention: Planning Supervisor

Subject: Southern Nevada Paving
Temporary Commercial Permit
Village at Queens Ridge Development.

To Whom It May Concern:

Attached, please find an application petition form and support materials submitted for approval of a Temporary Contractors Construction Yard with a co-located insitu processing plant. The proposed use will support the development of the approved Village at Queens Ridge mixed use development scheduled to open in 2008.

Southern Nevada Paving, the grading subcontractor on the job will utilize the onsite yard and plant site to process excavated onsite materials into usable construction materials including aggregate base and specification backfill material. The plant will be needed for approximately 4-6 months during the beginning stages of the project.

All information needed to process this land use petition is attached. Please contact the undersigned should you have any questions.

Best Regards,
Mark Miller

www.aggregate-us.com

Justification:

Southern Nevada Paving believes that the requested use is justified based on the following Reasons:

- Intensity of Use
- Reduced Traffic Loads
- Increase Safety
- Positive Air Quality Benefits

Each item is discussed in further detail below.

Intensity suitability:

The subject staging area and plant site represents only a small component on the numerous other construction activities that will occur at this \$850 million dollar development project. Major construction and surface disturbance activities such as mass grading, backfilling, building construction, installing underground utility works, paving and subgrade preparation, and landscaping will also occur. Given the scope of this approved project, the applicant submits that its use will be of similar or lower intensity than the other approved activities and will occur within the same permitted operational schedule.

Traffic congestion and safety:

The placement of the insitu plant will avoid additional haul traffic loads at the intersection of Rampart and Alta, which is already busy due to surrounding commercial centers and the Suncoast Casino. The set up of the insitu processing plant on the proposed construction yard would avoid rock trucks (aggregate doubles) exporting earthen materials to a remote site and then importing finished product back to the project. Avoiding additional haul truck traffic near an already busy commercial and residential area has obvious benefits to on-road safety and flow of traffic at the intersection of Alta and Rampart.

On -road emissions:

The haul truck traffic that would be otherwise necessary, if the portable plant is not permitted, would result in increased on-road emissions consisting of particulate matter and gaseous pollutants such as carbon monoxide, hydrocarbons, and nitrogen oxide. These emissions will in turn cause further deleterious impacts to the regional air quality in the Las Vegas Valley. In comparison, the small localized particulate emissions from the processing plant would be far lower than the on road emissions. Hence, the existence of the insitu plant will result in a positive net benefit to the air quality in the Las Vegas Valley.

Mitigation Measures:

The following preventive and control measures will be implemented by Southern Nevada Paving, to mitigate the intensity of impacts, if any, caused to the neighbor-hood community due to the subject surface disturbance and set-up of the insitu sand and gravel processing plant.

Visual Screening

The subject area will be shielded from outside views with a perimeter screening fence. In addition, the view of processing plant will be blocked on the North-West side with a product stockpile.

Traffic

The entrance/exit to the site will be located on Alta. The project will involve construction equipment such as graders, scrapers and excavators, which will be parked on-site during the work period. It is only the vehicle traffic of the employees on the job that would use the entrance/exit. This will have no impact on the existing traffic volumes as the work hours for the site are from 7.00am to 4.00pm and hence, cannot have any impact on the peak hour traffic. Strict track-out control measures imposed by Clark County Air Quality will be followed at all times.

Hours of operation

The hours of operation of the plant will be limited to the general permitted hours of 7:00am to 4:00pm, with no operating hours on Saturdays and Sundays.

Sound

U.S. Environmental Protection Agency identifies that a 24-hour exposure level of 70 decibels as the level of environmental noise which will prevent any measurable hearing loss over the average lifetime of a human being. The WHO (World health Organization) sets 85 decibels as maximum safe noise level for human exposure. OSHA (Occupational Health and Safety Administration) states that an 8- hour exposure to 90 decibels of noise is safe. The sound levels that results from the plant will be of similar magnitude to other construction equipment operating onsite, and will not result in offsite impacts that exceed any of the levels referenced above. The nearest residential receptor could expect worst case sound levels from the plant to be between 63-68 DB, event without a sound attenuating stockpile placed between the plant and residential receptors to the east. The stockpile will ensure soundlevels are deafened to below 55 DB at the same receptors. To put this value into perspective, the average face to face conversation occurs at approximately 65 DB. The soundlevel scale is logarithmic. A one point increase or decrease represents a ten fold increase/decrease in volume. In sum, the operation of the plant will have no adverse sound impacts and will not create any nuisance conditions in the area.

Dust and Air Quality

Any disturbed soils near the plant/yard area will be stabilized with water during and at the end of each workday. The primary method of dust control would be application of water via water trucks. Project soils will be pre-wet daily prior any disturbance activities that will commence. The control measures will be repeated as needed throughout the day to ensure opacity compliance. If water alone proves insufficient in controlling the emissions, Southern Nevada Paving will use a surfactant to enhance penetrating ability of applied water. Any stockpiles on the site will be sprayed with water to ensure that surface forms a crust and thereby emissions would be prevented. Southern Nevada Paving will ensure that in any case, no fugitive dust emissions will leave the site. Haul routes and the plant surroundings within the project will be watered throughout the day. At least one (1) water truck will remain onsite at all times. The processing plant will have water sprays at specified locations to ensure the dust does not exceed the permit limits.

Gravel pads (1-3" coarse gravel) will be used at the ingress egress.

Project Overview:

Southern Nevada Paving, the applicant, is the grading subcontractor on the new mixed use Village at Queens Ridge Commercial / Residential development located at the Northeast corner of Rampart and Alta Drive. As part of its scope of work, Southern Nevada Paving will utilize a temporary staging area with a portable crushing and screening plant to process existing stockpiled materials and over excavation into a usable construction material product. The insitu plant will avoid double handling materials and eliminate the traffic congestion that would otherwise occur under an export import scenario.

Analysis of Zoning Code Applicability:

Southern Nevada Paving submits that the proposed temporary use is allowed under the City of Las Vegas Zoning Code based on the following regulatory review:

Section 19.18.1 of the Las Vegas Zoning Code establishes that Temporary Commercial Permits are allowed for certain short term activities that would otherwise not be permitted uses. Further, Subsection C states that a Temporary Contractors Construction Yard , which may include an associated plant site, may be approved under a Temporary Commercial Permit provided the use is located at an same site as an approved development project and conforms to applicable standards and ordinances.

Since the proposed use meets the definition of a “Temporary Contractors Construction Yard” and will be dedicated to the site of an approved development project (e.g. Village at Queens Ridge), Southern Nevada Paving anticipates that this approval can be granted in consideration of the foregoing project justifications and mitigation measures.
