Your request for a Final Map Technical Review was considered by the Planning and Development Department on February 27, 2006.

The Planning Development Department Staff has administratively **APPROVED** your request, subject to the following:

5. On sheet 2, revise Common Lot "A" to read "10 foot Public Drainage Easement to be Privately Maintained by the Homeowner's Association and Access Road Easement for Maintenance for the Holmby Channel."

8. Provide a Site Visibility Restriction Zone at the intersection of the private street and Belcastro Street. Additionally, provide some explanation of what the shaded "Sight visibility Restriction Zone" areas are for. We suggest a statement such as "No walls, fences, trees, shrubs, utility appurtenances or any other object, other than traffic control devices and street light poles, may be constructed or installed within the Sight Visibility Restriction Zone (S.V.R.Z.) unless said object is maintained at less than 24 inches in height measured from adjacent top of curb, or where no curb exists, a height of 27 inches measured from the top of adjacent asphalt, gravel, or pavement street surface. Area shall be labeled as "Privately Maintained". In addition, we request that all future final maps within the City of Las Vegas also provide a similar explanation if S.V.R.Z.s are necessary.
9. Dimensions and information presented on the submitted civil improvement plans should match the Final Map. We note that information such as the dimensions for lots 1 and 4 and the curve data for C3 and C4 do not match the submitted civil plans. Revise drawings as necessary.
10. Site development to comply with all previous conditions of approval for the Belcastro Subdivision Tentative Map.
11. Prior to recordation, this Final Map must show all required easements and right-of-way dedications, must coincide with the approved drainage plan/study and construction plans, and the Owner's Certificate must make specific reference to all easements and right-of-ways noted/offered for public use as required by the Department of Public Works. Appropriate sight visibility restriction zones, if applicable, are also required to be shown on this Final Map at all interior intersections, at all perimeter intersections abutting this subdivision site, at all intersections where an interior subdivision street connects with an abutting public street and at all other locations as required by the Traffic Engineer.

This action by the Planning and Development Department on February 27, 2006 is final unless a written appeal is filed with the Director of Planning and Development within seven days of receiving written notice of the decision. A nonrefundable fee must accompany the appeal. The Planning Commission shall hear the appeal within 30 days after the appeal is filed with the Director.

A Drainage Plan and Technical Drainage Study must be submitted to and approved by the Department of Public Works prior to the issuance of any building or grading permits, submittal of any construction drawings or the recordation of a Map subdividing this site, whichever may occur first. Provide and improve all drainageways recommended in the approved drainage plan/study. The developer of this site shall be responsible to construct such neighborhood or local drainage facility improvements as are recommended by the City of Las Vegas Neighborhood Drainage Studies and approved Drainage Plan/Study concurrent with development of this site. In lieu of constructing improvements, in whole or in part, the developer may agree to contribute monies for the construction of neighborhood or local drainage improvements, the amount of such monies shall be determined by the approved Drainage Plan/Study and shall be contributed prior to the issuance of any building or grading permits, or the recordation of a Map subdividing this site, whichever may occur first, if allowed by the City Engineer.
9. Site development to comply with all applicable conditions of approval for SUP-4511 and all other subsequent site-related actions.
10. The approval of all Public Works related improvements shown on this Tentative Map is in concept only. Specific design and construction details relating to size, type and/or alignment of improvements, including but not limited to street, sewer and drainage improvements, shall be resolved prior to approval of the construction plans by the City. No deviations from adopted City Standards shall be allowed unless specific written approval for such is received from the City Engineer prior to the recordation of a Final Map or the approval of subdivision-related construction plans, whichever may occur first. Approval of this Tentative Map does not constitute approval of any deviations. If such approval cannot be obtained, a revised Tentative Map must be submitted showing elimination of such deviations.
