**Justification Letter for a Proposed Block Wall
at 1901-1917 Western Avenue
APN# 162-04-703-007 & 008**

The properties are located 1000 ft. South of the intersection of West Oakey Boulevard and Western Avenue. The properties are owned by Richard & Roxanne Owings and managed by Cambridge Group. Two single-story concrete block with metal roof buildings exist on the properties. One, a 10,500 s.f. Office/Retail and the Second, a 8,250 s.f. Office/Retail Building. Both buildings are currently unoccupied. A chain link security fence was installed and is continually being destroyed and the property vandalized and graffitied, currently surrounds the property (see attached photos). There is simply not enough security on this property and it's location for tenants to feel safe and secure.

The property owner would like to construct a concrete block wall, enclosing the property. Two (2) Variances will be requested to be granted with our design for the block wall.

Variance #1: To allow the concrete block wall on the East property line to be constructed to 12' in height – matching the adjacent property's block wall height. An 8' wall, as indicated in Title 19 Section 19.12.075, is too easily scaled by an individual wanting to commit a crime or vandalism. The extra height and the addition of razor wire on top will increase security for the property and the safety of the tenants occupying the buildings. Another reason for this request is to mediate the sound from the railroad tracks, thus will have no ill effect with the surrounding neighbors.

Variance #2: To waive the requirement for 20% architectural decorative feature on the perimeter wall. The reason we are requesting this variance is that our new walls are away from the public view - it would be a wasted expense. The new wall will match the adjacent properties' painted, smooth face concrete block walls making up the perimeter (photos provided). We intend to paint all perimeter walls a neutral color on the property side to match the building's color.

We hereby request approval of our design based on the merits as described above.

Sincerely,

Brian Wolfe
Cambridge Group
