The Secretary of the Interior's Standards for Rehabilitation

The Standards that follow were originally published in 1977 and revised in 1990 as part of Department of the Interior regulations (36 CFR Part 67, Historic Preservation Certifications). They pertain to historic buildings of all materials, construction types, sizes, and occupancy and encompass the exterior and the interior of historic buildings. The Standards also encompass related landscape features and the building's site and environment as well as attached, adjacent or related new construction.

The Standards are to be applied to specific rehabilitation projects in a reasonable manner, taking into consideration economic and technical feasibility.

1. A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.
2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.
3. Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.
4. Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.
5. Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a property shall be preserved.
6. Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.
7. Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.
8. Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.
9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.
10. New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Work Description

We have submitted a height variance to City of Las Vegas Planning Department, for review at the March 8th Planning Commission. Neon Museum Visitors Center has been having security problems with the existing 8' block wall fence around the Neon Boneyard Park with people getting over the wall and vandalizing the historic neon signs. The existing Neon boneyard Park block wall was approved and installed at 8'. The same problem will exist when the additional 8' block walls are to be added with the Neon Museum Visitors Center project

We request a variance to extended fence height 25 inches wrought iron on top of existing 8' masonry wall. The new wrought iron is to match existing gates colors (black).

RE: Neon Museum Visitors Center Justification letter for VAR for extended fence height to 10'-1".

Dear Flinn,

We are having a security problem with the existing 8' block wall fence around the Neon Boneyard Park with people getting over the wall and vandalizing the historic neon signs. The existing Neon boneyard Park block wall was approved and installed at 8'. The same problem will exist when the additional 8' block walls are to be added with the Neon Museum Visitors Center project.

We request a variance to add 25 inches wrought Iron on top the 8' CMU wall.

Capital Project Management requests planning approval as a reasonable accommodation to the security problem within the entire Neon Boneyard.

Sincerely,
