**Temporary Use Permit for Home Depot No. 3315
9705 W. Charleston Boulevard, Las Vegas, NV**

We would like to establish that it would be beneficial to the operation and the needs of the facility regarding providing an efficiently operating store while still working to comply with regulations set forth by the City of Las Vegas and ensuring the facility's exterior was consistent with the requirements of the City. In this discussion, the key items identified include the outdoor garden sales which occur between February and October, something which is not only positive for the store, but also provides greater tax revenue for the City. Additional items occurring include the display of tile with the bulk tiles behind them which are exhibited to the left of the canopy pick-up. To the right of the canopy pickup, items such as concrete, bags of gravel and sand are displayed.

In order to assist in this endeavor, I have enclosed the Site Plan at this time for your use as you consider this issue.

What we would like to propose is the following:

Outdoor Display/Front Sidewalk (as indicated on the diagram)

We would propose a outdoor display area which would have various merchandise throughout the season. This portion would be limited to a refined area which permits ADA pathways and appropriate exits from doorways, along with a path of travel.

I believe that with the attached diagram, it can be agreed that the proposal above is in concurrence with the intent of the City due to the fact that the displays in front of the store will be well shielded from existing residents due to the natural landscaping along Charleston which will act as a buffer regarding residential views from the walkway park area. The Garden Center Outdoor Sales Area will be comprised of plants in general, which will easily provide for the blending with the street landscaping for the natural look the City is going for.
