**** STAFF REPORT ****

APPLICATION REQUEST

This is a request for a Waiver from Section VI(A) of the City of Las Vegas Street Naming and Address Assignment Regulations, as adopted by Title 13.28, to allow an alternate addressing pattern to the standard counter clockwise directional requirement for an existing 248-unit condominium development on 14.81 acres adjacent to the east side of Buffalo Drive, approximately 630 feet north of Washington Avenue.

EXECUTIVE SUMMARY

The applicant is requesting a Waiver from Section VI(A) of the City of Las Vegas Street Naming and Addressing Assignment Regulations. The Waiver, if approved would allow addressing in a clockwise pattern, which is not consistent with the standard counterclockwise requirement. A clockwise addressing pattern poses a life safety issue as it is a deviation from the standard. Therefore, Planning staff and the Department of Fire Safety cannot support the request for the Waiver as indicated.

ANALYSIS

A) General Analysis and Discussion

The final map for Copper Palms Townhouses was recorded on July 10, 1996. The map as recorded is correct and consistent with Section VI (A) of the City of Las Vegas Street Naming and Address Assignment Regulations, as adopted by Title 13.28 of the Municipal Code. The map is recorded in a counter clockwise pattern starting at building number one (1) and continues to building number sixteen (16). The counter clockwise pattern in addressing is used as a safety protocol by the Department of Fire and Safety. The applicant did not use the recorded final map to address their site. Therefore, the recorded final map does not match the current addressing the developer posted on-site. The proposed address waiver will not remedy the current inconsistency, but will create a safety issue due to the change in standard addressing procedures that Fire and Rescue is accustomed to. The Fire Department uses the standard counter clockwise pattern to locate individuals in emergency situations. Therefore, the Department of Fire and Safety and Planning and Development cannot support the proposed amendment to Title 13.28.

Survey has no comment on the proposed re-addressing of the subject condominium development regarding the existing recorded final map. Final maps do not show or create addresses in any case. This is no different than any other subdivision map. Addresses are not valid descriptions of real property; therefore, the recorded final map should not be modified.

FINDINGS

The applicant indicates that the proposed Waiver of Title 13 will allow consistency with the legal address on file to match the physical address. Staff cannot support the subject deviation as it is inconsistent with the standard counter clockwise directional requirement. As noted, in Title 13, the Address Ordinance was adopted to develop a system that insures rapid emergency response. The proposed deviation is in direct conflict to the intent of the Ordinance. Therefore, staff recommends denial of the subject Waiver.
