Date: August 1, 2006
Re: Election Precinct Populations by Race & Ethnicity

The first three redistricting plans created by Judge Frederick Kessler on May 8, 2006 were based on current total population by precinct and Census 2000 race and ethnicity data. As of May 12, the Planning & Development Department completed its update of the race and ethnicity data and a thorough review of the precinct population data was conducted. Subsequent plans were created on May 15, and they, as well as all following plans, used the updated numbers. All population and race and ethnicity data were compiled by Planning and Development Department Staff.

The race and ethnicity data were originally based on 2000 census information. After three redistricting plans were generated, it was determined that the race and ethnicity data from the 2000 census could be updated. The Planning and Development Department updated the 2000 census data using information from the Nevada State Health Division on births and deaths by race and ethnicity, and historical migration patterns. The updates were then adjusted to assure consistency with the 2004 American Community Survey conducted by the U.S. Census Bureau. The result is total population by precinct by race and ethnicity that is reflective of current population and reliable for redistricting purposes.

The attached spreadsheet shows the precinct population by race and ethnicity according to Census 2000 data, and the updated race and ethnicity data as estimated by Planning & Development.

Submitted at City Council
Date 8/2/06 Item #163
