**** STAFF REPORT ****

APPLICATION REQUEST

This application is a request for a Variance to allow a front yard setback of eight feet where 20 feet is required, a rear yard setback of eight feet where 20 feet is required and a residential adjacency setback of eight feet where 66 feet is required on 0.38 acre at 2750 Harris Avenue.

EXECUTIVE SUMMARY

The proposed multi-family development requests setbacks of eight feet where 20 feet is required. The landscape buffer on the north side of the property bordering Harris Avenue is eight feet where 10 feet is required. Additionally, the buildings as proposed are too close to existing single-family properties to meet Residential Adjacency Standards. All of the inadequacies listed above violate the R-3 (Medium Density Residential) development standards. Since the buildings could have been designed to conform to Zoning Code standards, the recommendation is for denial.

ANALYSIS

A) Zoning Code Compliance

A1) Development Standards

Pursuant to Title 19.08, the following Development Standards apply to the subject proposal:

Standards	Required	Requested	Compliance
Min. Lot Size	6,500 Square Feet	16,550 Square Feet	Y
Min. Setbacks			
• Front	20 Feet	8 Feet	N
• Side	5 Feet	10 Feet	Y
• Corner	5 Feet	10 Feet	Y
• Rear	20 Feet	8 Feet	N
Max. Building Height	2 Stories / 35 Feet	2 Stories/ 22 Feet	Y
Trash Enclosure	50 Feet	49 Feet	N

The subject deviation for front and rear yard setbacks is 60%. The subject deviation for the trash enclosure is less than 1%. A condition of approval of the accompanying Site Development Plan Review is imposed to require the trash enclosure be moved to a minimum of 50 feet from the nearest residentially zoned property.

A2) Residential Adjacency Standards

Pursuant to Title 19.08, the following Residential Adjacency Standards apply to the subject proposal:

- a) Proximity slope. The proposed multi-family development does not meet the 3:1 residential adjacency slope to a R-E (Residential Estates) zoned property as required by Title 19.08.060 with a maximum building height of 22 feet. The multi-family development is required to be located a minimum of 66 feet from the adjacent single family property line and the site plan shows 8 feet. The subject deviation is 88%.
- b) Building setback. The adjoining western property is zoned R-E and has a minimum side yard setback of 10 feet. Residential Adjacency Standards state that the side yard setback of the proposed multi-family development must match the side setback of the single family home. The applicant provides 10 feet where 10 feet is required; therefore there is no deviation.

B) General Analysis and Discussion

The variances requested are related to setbacks and the residential adjacency requirement. The two buildings on the site are located 10 feet, 8 inches from single family properties where 66 feet is required, the front and rear yard setbacks do not conform to R-3 (Medium Density Residential) standards. The buildings can be designed in a different configuration that allows for compliance with R-3 development standards; therefore, denial is recommended.

FINDINGS

In accordance with the provisions of Title 19.18.070(B), Planning Commission and City Council, in considering the merits of a Variance request, shall not grant a Variance in order to:

- 1. Permit a use in a zoning district in which the use is not allowed;
- 2. Vary any minimum spacing requirement between uses;
- 3. Relieve a hardship which is solely personal, self-created or financial in nature.

Additionally, Title 19.18.070L states:

Where by reason of exceptional narrowness, shallowness, or shape of a specific piece of property at the time of enactment of the regulation, or by reason of exceptional topographic conditions or other extraordinary and exceptional situation or condition of the piece of property, the strict application of any zoning regulation would result in peculiar and exceptional practical difficulties to, or exceptional and undue hardships upon, the owner of the property, a variance from that strict application may be granted so as to relieve the difficulties or hardship, if the relief

may be granted without substantial detriment to the public good, without substantial impairment of affected natural resources and without substantially impairing the intent and purpose of any ordinance or resolution.

No evidence of a unique or extraordinary circumstance has been presented, in that the applicant has created a self-imposed hardship by selecting a building design that does not conform to the requirements set forth by the requested zoning category. Alternative site and building design would allow conformance to the Title 19 requirements. In view of the absence of any hardships imposed by the sites physical characteristics, it is concluded that the applicants hardship is preferential in nature, and it is thereby outside the realm of NRS Chapter 278 for granting of Variances.
