ANALYSIS

The request is for a General Plan Amendment from DR (Desert Rural Density Residential) to R (Rural Density Residential). The proposed R (Rural Density Residential) land-use category is a rural or semi-rural environment with a lifestyle much like that of DR (Desert Rural Density Residential), which allows for 3.59 units per acre. The 7.02 gross acre site is currently undeveloped.

The adjacent land use in this area is DR (Desert Rural Density Residential). The proposed R (Rural Density Residential) land-use category is a rural or semi-rural environment with a lifestyle much like that of DR (Desert Rural Density Residential) which allows for 3.59 units per acre. The applicant is requesting a development that allows 2.99 units per acre.

The site is also within the 330-foot buffer area of the Rural Preservation Overlay District. Within these buffer areas, residential development density is limited to three dwelling units per acre, unless good cause is shown. The density of the proposal is 2.99 units per acre; therefore, this proposal will be consistent with the surrounding land uses and zoning districts.

This general plan amendment was submitted in conjunction with a proposed Rezoning (ZON-16609) to the R-PD3 (Residential Planned Development 3 Units Per Acre) district, a WVR (WVR-16610) to allow approximately 173 feet between street intersections where 220 feet is the minimum distance separation required, and a Site Development Plan Review (SDR-16611).

FINDINGS

Section 19.18.030.I of the Las Vegas Zoning Code requires that the following conditions be met in order to justify a General Plan Amendment:

1. The density and intensity of the proposed General Plan Amendment is compatible with the existing adjacent land use designations,
2. The zoning designations allowed by the proposed amendment will be compatible with the existing adjacent land uses or zoning districts,
3. There are adequate transportation, recreation, utility, and other facilities to accommodate the uses and densities permitted by the proposed General Plan Amendment; and
4. The proposed amendment conforms to other applicable adopted plans and policies that include approved neighborhood plans.

In regard to 1:

The adjacent land use in this area is DR (Desert Rural Density Residential). The proposed R (Rural Density Residential) land-use category is a rural or semi-rural environment with a lifestyle much like that of DR (Desert Rural Density Residential) which allows for 3.59 units per acre. The applicant is requesting a development that allows 2.99 units per acre. Therefore, the density and intensity of the proposed General Plan Amendment are compatible with the existing land-use designations.

In regard to 2:

The surrounding land uses are DR (Desert Rural Residential). The surrounding zoning is R-PD3 (Residential Planned Development 3 Units Per Acre) and R-E (Residence Estates).

The site is also within the 330-foot buffer area of the Rural Preservation Overlay District. Within these buffer areas, residential development density is limited to three dwelling units per acre, unless good cause is shown. The density of the proposal is 2.99 units per acre; therefore, this proposal will be consistent with the surrounding land uses and zoning districts.

In regard to 3:

The site is served by Torrey Pines Drive, a Secondary Collector 80 feet in width. Since the applicant is requesting a private drive with a cul-de-sac greater than 500 feet, the applicant has provided an emergency access to Azure Drive. The addition of twenty-one residential lots will not negatively affect this thoroughfares ability to handle traffic flow.

In regard to 4:

There are no other adopted plans or policies that apply to this application.
