To Whom It May Concern:

This letter is in response to VAR-18669 in the name of Todd Morin, who is requesting a variance to allow an existing structure to exceed the height of the principle dwelling by 1.5 feet at 5901 Huff Mountain Ave. As you can tell, we live on the same street, and actually just a few houses down, and we do not feel the structure poses any problem. If it is too tall as stated, you can't tell by just looking at it with the naked eye, and therefore we feel the structure should be able to exist. If it takes a measuring tape to notice the difference, I don't understand why lowering the structure by only 1.5 feet will make a visual difference. In closing, our opinion is we think the structure should be allowed to exist. Thank you.
