**** STAFF REPORT ****

PROJECT DESCRIPTION

The proposed development is for a five-lot single-family residential subdivision. The site would be accessed by a cul-de-sac off Deer Springs Way. The project requires a Variance to allow a Residential Planned Development on less than five acres and a waiver of streetscape requirements along Deer Springs Way. These deviations are not supported as they are due to the applicants design choices. The proposed development standards more closely match the R-D (Single-family Residential-Restricted) District than the R-E (Residence Estates) that is currently in place on the site and is most prevalent in the area. The rezoning would permit five lots where four lots would be permitted under the current designation. Due to the deviations from standards and smaller lot sizes than the adjacent property, denial of this request is recommended.

<i>Open Space</i>
Per Title 19.06.040 Residential Planned Developments with less than 12 dwelling units are not required to provide open space. This development is proposing five-lots and is not required to provide open space. It is noted that the applicant is proving a six-foot streetscape area along Bradley Road (Common Lot A) that includes landscaping that meets Code requirements. The applicant is requesting a waiver of the streetscape requirements along Deer Springs Way.

Pursuant to Title 19.10, the following parking standards apply:

<i>Parking Requirement</i>
The project is required to provide a minimum of two parking spaces pre dwelling unit. Each unit is proposed to have a minimum of a two car garage, while most units include a three car garage. This meets Title 19.10 parking requirements.

Waivers

Streetscape requirements along Deer Springs Way. The applicant is requesting no streetscape and would like rural standards in this area.	6 Feet	This waiver is not supported and the applicant should provide the streetscape along Deer Springs Way.

ANALYSIS

The proposed development would consist of five lots. The smallest lot is 16,030 square feet. The largest lot is 16,575 square feet. The current R-E (Residence Estates) zone permits a minimum lot size of 20,000 square feet; therefore, with the current zoning a total of four lots would be permitted. The setbacks that are proposed are similar to the setbacks for the R-D (Single-family Residential-Restricted) District. These setbacks are much less than what is permitted in the R-E (Residence Estates) Zone. Elevations show one and two story homes. Materials will consist of stucco and Spanish tile. Colors will be white and tan stucco with tan and green accents.

Per Title 19.06.040 for the R-PD (Residential Planned Development) District the minimum site area that is eligible for rezoning to the R-PD (Residential Planned Development) zoning district is five acres. Any additional tract which contains less than the minimum site area, but which is contiguous to property previously zoned R-PD (Residential Planned Development), may also be zoned R-PD (Residential Planned Development) by the City Council if it otherwise qualifies for the R-PD (Residential Planned Development) zoning designation. Both such properties must be owned by or be under the control of the same property owner. This particular development is an infill parcel. The adjacent parcels are zoned R-E (Residence Estates). The site does not meet the intent of the R-PD (Residential Planned Development) District as defined in Title 19.06.

The proposed development would have five lots and would not require open space. It is noted that streetscape is required along both Bradley Road and Deer Springs Way. The applicant is providing the required six-foot wide streetscape along Bradley Road; however, a waiver is requested for the streetscape along Deer Springs Way. This is in an effort to maintain a rural appearance to the property. This waiver is not supported as the applicant has the room to provide for this landscaping and is opting not to provide the streetscape based on their design choices.

The homes are single and two-story homes. These homes range in size from 3,300 to 4,800 square feet and typically feature three-car garages. Design and color schemes are typical of development in this area.

FINDINGS

In order to approve a Site Development Plan application, per Title 19.18.050 the Planning Commission and/or City Council must affirm the following:

1. The proposed development is compatible with adjacent development and development in the area;

The proposed development is not considered compatible with the area. The adjacent cul-de-sac features three lots built to R-E standards. The proposed development consists of five lots and the proposed standards more closely match those of the R-D District.

2. The proposed development is consistent with the General Plan, this Title, the Design Standards Manual, the Landscape, Wall and Buffer Standards, and other duly-adopted city plans, policies and standards;

The proposed development is not consistent with Title 19. The project requires a Variance (VAR-17244) to allow a Residential Planned Development on less than five acres. Additionally, the project does not meet the intent of the Residential Planned Development District as defined in Title 19.06.040. The site also requires a waiver of streetscape standards along Deer Springs Way, as designed. Due to these several deviations from Title 19, denial of this request is recommended.

3. Site access and circulation do not negatively impact adjacent roadways or neighborhood traffic;

Site access is provided from Deer Springs Way an 80-foot Secondary Collector. This street will provide adequate access to the proposed development.

4. Building and landscape materials are appropriate for the area and for the City;

Building and landscape materials are appropriate for the area and the City of Las Vegas.

- 5. Building elevations, design characteristics and other architectural and aesthetic features are not unsightly, undesirable, or obnoxious in appearance; create an orderly and aesthetically pleasing environment; and are harmonious and compatible with development in the area;**

Elevations and design characteristics are not unsightly or obnoxious and will be harmonious and compatible with development in the area.

- 6. Appropriate measures are taken to secure and protect the public health, safety and general welfare.**

The proposed development will not compromise the public health or the general welfare.
