## ANALYSIS

This Variance to the Title 19.10 parking requirements stems from the result of a three-phased development that inadequately addressed parking in its totality. The first phase consisted of a 58,528 square-foot office building (7881 West Charleston Boulevard) that was approved through an administrative site plan development review [Z-0004-97(3)]. The parking requirement was calculated for office use at one space per each 300 square feet of building gross floor area (GFA) for a total parking requirement of 196 spaces. The development provided 208 spaces.

The following development, a 6,500 square-foot veterinary clinic, (7891 West Charleston Boulevard) was also approved through an administrative site development plan review [Z-0004-97(4)]. The project had an individual parking load calculated at a rate of 1 space per 2 on-duty employees, plus one space per exam room, and one space per each veterinarian for a total of 10 spaces; the applicant provided 19 spaces. The cumulative total for the two lots of the commercial subdivision totaled 217 spaces.

When the third lot of the commercial subdivision was reviewed under Site Development Plan Review (SDR-3108) for a 9,253 square-foot retail building, the parking standard utilized was for a commercial center at a rate of 1 parking space per 250 square feet of gross floor area. Under this parking calculation, the total required parking was 36 spaces of which 24 spaces were provided on site. As the commercial subdivision had provided a shared parking agreement within its Codes, Covenants, and Restrictions, the shortage of parking from the retail center was applied to the overall parking provided on the commercial subdivision. Due to the fact that total parking count of the commercial subdivision was derived from an itemized listing of individual uses and not the General Retail Store, Other Than Listed use, an improper amount of parking has resulted for the individual lot located at 7871 West Charleston. Since the approval of the shopping center portion of the development was completed, the total on-site parking provided is 267 spaces with 10 of those spaces dedicated for accessibility. Staff is recommending that all uses on the commercial subdivision be combined under the General Retail Store, Other Than Listed use and to calculate the parking requirement at a rate of 1 space per 250 square-feet gross floor area. Doing this will result in a net parking requirement of 301 spaces, with an adequate amount of accessible spaces already being provided.

The result has been that the businesses at 7881 W. Charleston Boulevard have been restricted in use due to a calculated parking shortage. There are two lease-able spaces that are not adequately accommodated by the previous approvals. The commercial subdivision provides a shared parking agreement for customers visiting all three lots with a considerable time-shift in use throughout the day. The office and veterinarian parking is available to the restaurant customers at 7871 W. Charleston Blvd. during the later portion of the day, with the opposite holding true for the office and animal hospital during the day. As there has been no record of parking shortages or complaints, it is a reasonable expectation that an approved Variance will address the parking requirements without adversely affecting the overall parking provisions on the commercial subdivision. Therefore, staff is recommending the approval of this requested Variance to allow 301 spaces.

## **FINDINGS**

In accordance with the provisions of Title 19.18.070(B), Planning Commission and City Council, in considering the merits of a Variance request, shall not grant a Variance in order to:

1. Permit a use in a zoning district in which the use is not allowed;
2. Vary any minimum spacing requirement between uses;
3. Relieve a hardship which is solely personal, self-created or financial in nature.

Additionally, Title 19.18.070L states:

Where by reason of exceptional narrowness, shallowness, or shape of a specific piece of property at the time of enactment of the regulation, or by reason of exceptional topographic conditions or other extraordinary and exceptional situation or condition of the piece of property, the strict application of any zoning regulation would result in peculiar and exceptional practical difficulties to, or exceptional and undue hardships upon, the owner of the property, a variance from that strict application may be granted so as to relieve the difficulties or hardship, if the relief may be granted without substantial detriment to the public good, without substantial impairment of affected natural resources and without substantially impairing the intent and purpose of any ordinance or resolution.

Staff believes that cumulative actions resulting from two previous administrative Site Development Plan Reviews covering the office building and veterinary clinic in combination with the Site Development Plan Review for the one-story commercial building resulted in the appearance of a parking shortage. The applicant seeks to remedy this situation by applying the General Retail Store, Other Than Listed on-site parking requirement to the entire commercial subdivision and requesting a Variance to cover a 12% shortage of required parking spaces.

**PLANNING COMMISSION ACTION**

At the Planning Commission meeting it was established that a shared parking agreement is on file with the city.
