<i>(heaviest 60 minutes)</i>				
Traffic Capacity of adjacent streets:				
	Adjacent street ADT			
	Capacity			
Sahara Ave.	51700			
Maryland Pkwy.	51700			

This project will add approximately 8 trips per day on Sahara Ave. and Maryland Pkwy. This will increase expected volumes by less than 1 percent on both of these streets. Sahara is at about 93 percent of capacity and Maryland is at about 77 percent of capacity.				
Based on Peak Hour use, this development will add roughly 1 additional car into the area; which works out to about 1 every 60 minutes.				
Note that this report assumes all traffic from this development uses all named streets.
