**Dept./Division:**

**PURPOSE/BACKGROUND:**

The National Environmental Protection Agency is proposing to reduce the National Ambient Air Quality Standard for Ozone, which could have a significant impact upon the future growth and development of the Las Vegas Valley. The City has been asked to support efforts to maintain the standard at its current level, which is viewed as the proper balance between maintaining appropriate air quality standards and allowing for continued growth and development of the area.

**RECOMMENDATION:**

It is recommended that the City Council consider approval of this Resolution and, if approved, authorize its execution on behalf of the City.
