ANALYSIS

A) Planning discussion

This application is a request for a Vacation of a 60-foot wide public right-of-way generally located on Rose Street south of Goldring Avenue. It is the applicants intention to use this right-of-way for a public drive, but it is likely that this former portion of Rose Street will be used for future development. As this portion of Rose Street is no longer needed in its current configuration; staff recommends approval of this request.

B) Public Works discussion

The following information is presented concerning this request to vacate certain public street right of ways:

- A. Does this vacation request result in uniform or non-uniform right-of-way widths?

It will result in a uniform right-of-way width as it will completely eliminate Rose Street south of Goldring Avenue.

- B. From a traffic-handling viewpoint will this vacation request result in a reduced traffic handling capability?

No, since the current alignment of Rose Street ends in a previously vacated area and mostly serves as access to a parking lot.

- C. Does it appear that the vacation request involves only excess right-of-way?

Yes, as the vacated portion of Rose Street will be incorporated into the University Medical Center campus.
