JUSTIFICATION LETTER FOR SHEA AT TENAYA
REVIEW OF CONDITIONS

RE: ARC-20019 (City Council meeting of April 4, 2007)

I would like to have a Review of Conditions for the above referenced project because the final conditions state that second-level non-illuminated wall signage on buildings "A" and "B" is approved for the North elevations only.

The original intent of our waiver for this item was to have illuminated wall signage on the second level of buildings "A" and "B" on the North elevations.

The code would have allowed illuminated signs on the first level of buildings "A" and "B", on the North elevation so I assumed the illumination did not have to be considered.

Please consider our request.

Sincerely,

Rich Hinshaw
