To allow an existing street to terminate without the required cul-de-sac.	A cul-de-sac of sufficient radius for emergency vehicle and other large vehicle access.	Approval

Title 18.12.130 Cul-de-sacs

Cul-de-sacs shall be designed and installed in accordance with City standards. For public streets which terminate other than at an intersection with another public street, the termination shall be provided by means of a circular cul-de-sac of a sufficient diameter to accommodate emergency service vehicles for termination. For private streets or drives which terminate at a length over one hundred fifty feet, there shall be either a circular turn-around or emergency service vehicle access gates.

Public works has no objection to the Request for a Waiver of Title 18.12.130 to allow an existing public street to terminate with a nonstandard cul-de-sac.

FINDINGS

The applicant has presented evidence of a unique circumstance, in that the street will not be terminated fully, rather it will be an entry point a public park, secured with a gate, which would allow emergency vehicles to travel through the site to Harris Avenue. Public works has no objection to the Request for a Waiver of Title 18.12.130 to allow an existing private street to terminate without a circular cul-de-sac or emergency access gate. Staff finds there are no anticipated negative impacts to vehicular travel in this area, nor to emergency response vehicles, therefore staff recommends approval.
