R-5 (Apartments)	Unlimited	Unlimited
<i>General Plan</i>	<i>Permitted Density</i>	<i>Units Allowed</i>
MXU (Mixed Use)	H (High Density Residential)	Unlimited

ANALYSIS

•Zoning

The subject properties are located within the boundaries of the Las Vegas Redevelopment District, and have a MXU (Mixed Use) land use designation. The Mixed-Use category allows for a mix of uses that are normally allowed within the L (Low Density Residential), ML (Medium Low Density Residential), M (Medium Density Residential), H (High Density Residential), O (Office), SC (Service Commercial), and GC (General Commercial) Master Plan land use categories.

The subject properties are zoned R-4 (High Density Residential) and are located within the Downtown South District of the Downtown Overlay District. The applicants proposed density for the site is 112 units per acre, which exceeds the R-4 (High Density Residential) zoning districts limitation of 50 units per acre. Therefore, the applicant has requested to rezone the two parcels to the R-5 (Apartment) zoning district, which has no limitation on density. Multi-family developments are permitted uses within the Downtown South District and the R-5 (Apartment) zoning district.

This rezoning has been submitted in conjunction with a Site Development Plan Review (SDR-28017) for a 54-Unit apartment complex with Waivers of the Downtown Centennial Streetscape and Architectural Design Standards.

• **Las Vegas 2020 Master Plan - Neighborhood Revitalization**

The subject properties are located within the boundaries of the Las Vegas 2020 Master Plan Neighborhood Revitalization area. The Master Plan seeks to stabilize and improve these areas that form the heart of the community, protect them from the intrusion of non-residential land uses, and where a transition to incompatible non-residential activities is underway, to integrate these uses in a sensitive and attractive manner. A key component of neighborhood revitalization is the redevelopment of declining commercial centers or vacant land into mixed-use urban hubs, creating a walkable and interesting urban environment.

OBJECTIVE 2.6: To improve the amount and quality of infill development on vacant and underutilized lands within established areas of the city.

POLICY 2.6.1: That the City investigates the development of an incentive program designed to encourage property owners to redevelop vacant or derelict sites within the Neighborhood Revitalization area.

POLICY 2.6.2: That the City take steps to encourage the development of two, three and four plex housing opportunities.

FINDINGS

In order to approve a Rezoning application, pursuant to Title 19.18.040, the Planning Commission or City Council must affirm the following:

1. The proposal conforms to the General Plan.

The Mixed-Use category allows for a mix of uses that are normally allowed within the L (Low Density Residential), ML (Medium Low Density Residential), M (Medium Density Residential), H (High Density Residential), O (Office), SC (Service Commercial), and GC (General Commercial) Master Plan land use categories. As an apartment complex of this size conforms to the H (High Density Residential) land use category; therefore the R-5 (Apartment) zoning district is in compliance with the MXU (Mixed Use) General Plan category.

2. The uses which would be allowed on the subject property by approving the rezoning will be compatible with the surrounding land uses and zoning districts.

The proposed rezoning will be compatible with the residential and commercial developments in this area. The site is surrounded by parcels that are all within the Downtown Redevelopment Area that are designated either C (Commercial) and MXU (Mixed Use), which allows a range of residential and commercial uses.

3. Growth and development factors in the community indicate the need for or appropriateness of the rezoning.

Growth and development factors indicate a need for housing options of this character to locate in this area. This is an existing multi-family residential site that will be redeveloped with an increased capacity and improved amenities for the residents of the upgraded multi-family residential complex. The apartment complex will be a positive addition to a site that has a history of code enforcement violations, which will further 2020 Master Plan Neighborhood Revitalization objectives to improve the amount and quality of infill development on vacant and underutilized lands within established areas of the city

4. Street or highway facilities providing access to the property are or will be adequate in size to meet the requirements of the proposed zoning district.

Vehicular access to the structure will be from the alley way off of Utah Avenue. The intensity of the development will not add a significant amount of traffic to the existing network, which there is adequate capacity to address the added impacts.
