July 14, 2008

To Whom It May Concern,

As owner and operator of SuperTech Services I am requesting at this time that you consider my request to for a Special Use Permit. The approval of the permit will allow my shop license to be upgraded from Minor Automotive Repair to Major Automotive Repair.

In today's increasingly volatile economy, many of my customers are seeking to "hold on" to their vehicles which in many cases requires more work than we are currently licensed to perform. Rather than continue to let those customers down, and refer them elsewhere, we would like to keep them within our family. The Special Use Permit & licensing as a Major Repair Facility would allow us to keep our customer base & also perhaps expand for a more solid financial foothold in our community.

Currently, as an Automotive Repair and Emissions Testing facility we are governed by many entities, including the DMV, EPA, Clark County Fire Department, Clark County Health Department, and the City of Las Vegas. We have always held ourselves to the highest standards. My technicians and I are ASE Certified as well as certified (2G) Inspection and maintenance by the Nevada Department of Motor Vehicles.

With the increase in our responsibilities, there will be no decrease in our dedication to our customers or our standards. We want to be a viable part of this community.

Sincerely,

Richard (Rick) Braunersrither
Pres. SuperTech Services Inc
