ANALYSIS

•Zoning

The subject property is located in a U (Undeveloped) zone under a Resolution of Intent to a C-2 (General Commercial) zoning district. The C-2 (General Commercial) District is designed to provide the broadest scope of compatible services for both the general and traveling public. This category allows retail, service, automotive, wholesale, office, and other general business uses of an intense character, as well as mixed-use developments. This district should be located away from low and medium density residential development and may be used as a buffer between retail and industrial uses. The C-2 (General Commercial) District is also appropriate along commercial corridors. The C-2 (General Commercial) District is consistent with the General Commercial category of the General Plan. The proposed Supper Club use is permissible in a C-2 (General Commercial) District with approval of a Special Use Permit. This application is intended to satisfy this requirement.

• Use

Supper Club is defined as a restaurant and bar operation with alcoholic beverage sales in which the bar area is separated from the restaurant area by a barrier sufficient to prevent access to the bar by minors; the actual seating available at all times within the restaurant area will accommodate at least 125 persons; alcoholic beverages are served in the restaurant area only in conjunction with the service of food; full course meals are available during all hours the bar area is open to the public; a cook and food server, other than a bartender, are available at all times the bar area is open to the public; and the restaurant operation is the principal portion of the business.

The proposed 12,195 square-foot Supper Club meets Title 19.04 requirements pertaining to seating capacity, kitchen hours, staffing levels, and restaurant/lounge separation.

•Minimum Special Use Requirements

1. No Supper club use shall be located within 400 feet of any church, synagogue, school, childcare facility licensed for more than 12 children, or City Park.
2. Except as otherwise provided in Requirements 3 below, the minimum distances referred to in Requirement 1 shall be determined with reference to the shortest distance between two property lines, one being the property line of the proposed supper club which is closest to the existing use to which the measurement pertains, and the other being the property line of that existing use which is closest to the proposed supper club. The distance shall be measured in a straight line without regard to the intervening obstacles. For the purposes of measurement, the term property line refers to property lines of fee interest parcels and does not include the property line of:
 - a. Any leasehold parcel; or
 - b. Any parcel which lacks access to a public street or has no area for on-site parking and which has been crated so as to avoid the distance limitation described in Requirement 1.
3. In the case of a supper club proposed to be located on a parcel of at least 80 acres in size, the minimum distances referred to in Requirement 1 shall be measured in a straight line:
 - a. From the nearest property line of the existing use to the nearest portion of the structure in which the supper club will be located, without regard to intervening obstacles; or
 - b. In the case of a proposed supper club which will be located within a shopping center or other multiple-tenant structure, from the nearest property line of the existing use to the nearest property line of a leasehold or occupancy parcel in which the supper club will be located, without regard to intervening obstacles.
4. When considering a Special Use Permit application for a supper club, which also requires a waiver of the distance limitation in Requirement 1, the Planning Commission shall take into consideration the distance policy and shall, as part of its recommendation to the City Council, state whether the distance requirement should be waived and the reasons in support of the decision.
5. In the O District, a supper club is permitted only as an accessory use.
6. All businesses that sell alcoholic beverages shall conform to the provisions of LVMC Chapter 6.50.

The proposed 12,195 square-foot Supper Club does not meet the Minimum Special Use Permit Requirements set forth in requirement #1: the subject property has a 141-foot distance separation from the property line of a City Park located northeast of the site. Though the property lines have a 141-foot distance separation, the Supper Club is located in the southern portion of the parcel, which is more than 1,500 feet from the park. There is a storm drain feature which separates this property physically from the park, as well as a mid-rise residential development situated between the proposed use and the property line of the park. That development will allow no public access between the commercial portions of the subject site and the area of the parcel adjacent to the park, staff supports this application including the Waiver request.

FINDINGS

In order to approve a Special Use Permit application, per Title 19.18.060 the Planning Commission and City Council must affirm the following:

- 1. The proposed land use can be conducted in a manner that is harmonious and compatible with existing surrounding land uses, and with future surrounding land uses as projected by the General Plan.**

The C-2 (General Commercial) zoning district is consistent with the General Plan designation of the GC (General Commercial). The proposed Supper Club is a compatible use with neighboring commercial and residential uses within the Mixed-Use development. Therefore, the proposed use will be compatible and harmonious with the existing uses and future surrounding land uses.

- 2. The subject site is physically suitable for the type and intensity of land use proposed.**

The site is physically suitable for this type of use and the intensity is appropriate in this area. Ample site access is provided and adequate parking is being provided in accordance with the approved Variance (VAR-10773) for the Mixed-Use development. Though the distance separation of the proposed Supper Club is less than the Minimum Special Use Permit Requirement of 400 feet from a City Park, the actual proximity to the protected use is more than 600 feet with several residential structures positioned between the two uses.

- 3. Street or highway facilities providing access to the property are or will be adequate in size to meet the requirements of the proposed use.**

The subject site is accessed by Rampart Boulevard, a 100-foot Primary Arterial, or by Alta Drive, an 80-foot Collector Street, as depicted within the Master Plan for Streets and Highways. Both streets are sufficient to accommodate the amount of vehicular trips associated with the proposed use.

4. Approval of the Special Use Permit at the site in question will not be inconsistent with or compromise the public health, safety, and welfare or the overall objectives of the General Plan.

The proposed use will not result in detrimental effects to the human health and public safety as the project must comply with Chapter 6.50 of the Municipal Code, as well as section 268.090 of the Nevada Revised Statutes, which further governs the sale and distribution of alcoholic beverages.

5. The use meets all of the applicable conditions per Title 19.04.

The proposed use does not meet all the Minimum Special Use Permit Requirements per Title 19.04 due to the proximity to a City Park. A Waiver to allow a 141-foot distance separation requirement from the protected use, where 400 feet is required has been requested.
