RE: True Love Baptist Church- 1941 H Street

Dear Planner:

We are proposing to add 4,686 square feet of modular building to our existing church property and requesting a **zone change** from R-4 to C-V. We are anticipating improving the current parking and landscape on our property as required by Title 19 Design Review Guidelines and applying for a **Site Design Review** as well. On November 12, 2008 we met with David Cornoyer along with the CLV Planning review team and have incorporated their comments on our current design that you will be reviewing. We are also asking to reduce landscape buffering requirements for 85'-0" along the south property line since we have less than 3'-0" of landscape area to plant large trees at 20'-0" on center. Currently, we do not have any landscape improvements on site. Thank you for your time in reviewing our proposed improvements and hope to gain your approval of our request for Zone Change and Site Design Review.

Respectfully,

Curtis Wilson
