*Waivers for non-compliance of Downtown Centennial Plan Standards were approved under Site Development Plan Review SDR-29662.

Redevelopment Plan Area The subject site is located within the boundaries of the Las Vegas Redevelopment Plan District.

Downtown Centennial Plan (Las Vegas Boulevard and Central Casino Core) The Las Vegas Boulevard District creates a spine for most of the districts and is the primary tourist commercial and entertainment-directed link between The Strip, Downtown and its varied Districts. The District is generally defined to include the Las Vegas Boulevard right-of-way and all those properties adjacent thereto with frontage on both the west and east sides of the right-of-way. The Central Casino Core is home to the classic and historic Las Vegas casinos of Glitter Gulch. It is bounded by the eastern side of the Union-Pacific Railroad right-of-way on the west, Interstate 515 on the north, the western property line of the properties on the west side of 8th Street to Bridge on the east and then the centerline of Bridger on the south. Properties along Las Vegas Boulevard are exempt from this district and must adhere to the Las Vegas Boulevard District standards.

Downtown Overlay District The subject site is located within the Downtown Overlay District. The intent of the Downtown Overlay District is to establish special design standards for development within the City's established urban core.

Live/Work Overlay The subject site is within the Live/Work Overlay district. The proposed development will not offer any housing options; therefore, the project is not impacted by the Live/Work standards as outlined in Title 19.06.030.

ANALYSIS

Condition Number 19 was approved as follows:

This Site Plan shall be revised to remove the southernmost driveway along Las Vegas Boulevard. The northernmost driveway shall be reconstructed per Downtown Centennial Modified Pan Design. The applicant shall meet with the Traffic Engineering Representative for assistance in the possible redesign of the proposed on site circulation and parking lot layout prior to the submittal of any construction plans or the issuance of any permits, whichever may occur first.

The applicant has requested to delete the condition in its entirety. In the event that the request to delete condition number 19 is approved, the Department of Public Works has provided a revised condition below:

**ROC-33625 - Staff Report Page Five
 April 9, 2009 - Planning Commission Meeting**

The City reserves the right to close the Southern driveway on Las Vegas Boulevard South and require the owner to redesign the parking and onsite circulation at their own expense upon receipt of written notices from the City Traffic Engineer that such closure is needed for purposes of public safety.

FINDINGS

Staff finds no substantial justification made by the applicant to support a Review of Condition to the Site Development Plan Review (SDR-29662) as approved by the City Council. The deletion of Condition 19 would allow for the existing curb cut at the southeast corner of the property near the intersection of Ogden Avenue and Las Vegas Boulevard to remain. Because of the proximity to the intersection, the driveway poses a public safety hazard as there is not adequate stacking space or visibility. Public Works has no objection to this request provided the conditions of approval are imposed. Therefore, the request for the deletion of condition 19 is not recommended.
