DEPARTMENT: PLANNING AND DEVELOPMENT

**ITEM DESCRIPTION - SDR-34469 - APPLICANT/OWNER: CARDAN LINDELL
NORTH, LLC**

**** CONDITIONS ****

The Planning Commission (4-3/bg/se/ke vote) and staff recommend APPROVAL

Planning and Development

1. Approval of and conformance to the Conditions of Approval for Rezoning (ZON-4550), Site Development Plan Review (SDR-4551), and Variances (VAR-4553 and VAR-8348) shall be required.
2. This approval shall be void two years from the date of final approval, unless a building permit has been issued for the principal building on the site. An Extension of Time may be filed for consideration by the City of Las Vegas.
3. All development shall be in conformance with the site plan and building elevations, date stamped 05/12/09, and landscape plan, date stamped 05/27/09, except as amended by conditions herein.
4. All signage shall require permits pursuant to Title 19.14. A Master Sign Plan is not required for projects less than 15 acres in size, per Title 19.14.030, effective 07/16/03.
5. A technical landscape plan, signed and sealed by a Registered Architect, Landscape Architect, Residential Designer or Civil Engineer, must be submitted prior to or at the same time application is made for a building permit. A permanent underground sprinkler system is required, and shall be permanently maintained in a satisfactory manner; the landscape plan shall include irrigation specifications.
6. Pre-planting and post-planting landscape inspections are required to ensure the appropriate plant material, location, size of planters, and landscape plans are being utilized. The Planning and Development Department must be contacted to schedule an inspection prior to the start of the landscape installation and after the landscape installation is completed. A certificate of occupancy will not be issued or the final inspection will not be approved until the landscape inspections have been completed.
7. Reflective glazing at the pedestrian level is prohibited. Glazing above the pedestrian level shall be limited to a maximum reflectance rating of 22% (as defined by the National Institute of Standards and Technology).
8. All mechanical equipment, air conditioners and trash areas shall be fully screened in views from the abutting streets.

9. All utility boxes exceeding 27 cubic feet in size shall meet the standards of LVMC Title 19.12.040.
10. Parking lot lighting standards shall be no more than 30 feet in height and shall utilize downward-directed lights with full cut-off luminaries. Lighting on the exterior of buildings shall be shielded and shall be downward-directed. Non-residential property lighting shall be directed away from residential property or screened, and shall not create fugitive lighting on adjacent properties.
11. A fully operational fire protection system, including fire apparatus roads, fire hydrants and water supply, shall be installed and shall be functioning prior to construction of any combustible structures.
12. All City Code requirements and design standards of all City Departments must be satisfied, except as modified herein.

Public Works

13. Remove all substandard public street improvements and unused driveway cuts adjacent to this site, if any, and replace with new improvements meeting current City Standards concurrent with development of this site.
14. An update to the previously approved Drainage Plan and Technical Drainage Study must be submitted to and approved by the Department of Public Works prior to the issuance of any grading or building permits or the submittal of any construction drawings, whichever may occur first. Provide and improve all drainageways as recommended in the approved drainage plan/study.
15. Site development to comply with all applicable conditions of approval for SDR-4551 and all other site-related actions.

**** STAFF REPORT ****

PROJECT DESCRIPTION

The subject property contains an existing 42,809 square-foot Motor Vehicle Sales (New) Establishment located at 5550 West Sahara Avenue. The applicant is proposing to place vehicle display parking spaces with enhanced paving within the existing parking lot along the south and west portions of the site, provide parking lot shade structures, provide façade renovations and add two porte cocheres along the south and east sides of the existing building. No expansion to the existing building or parking lot will take place as a result of this application. If the application is denied the subject property will remain in its current configuration without any further enhancements.

Issues

- Staff supports the request for a Major Amendment to an Approved Site Development Plan Review as this proposal will allow building façade and interior renovations to take place, place additional landscape within the existing parking lot and vehicle display areas, and add shade structures to the vehicle display area and drop-off areas.
- The proposed modifications to the existing site meet all applicable Title 19 requirements.

ANALYSIS

- **Site Plan**

The site plan depicts a new hard surface vehicle display area along the southern portion of the site, and along portions of the east and west perimeters of the site. These vehicle display areas will replace existing asphalt paving, and add four circular display pads, which will not intrude into the existing 10-foot landscape buffer area, they will only replace existing asphalt. The two porte cocheres which will be added to the site enhance the proposed renovations to the façade of the building and meet all applicable Title 19 requirements. A total of seven additional shade structures will be added to the southern parking lot area of the site, all visible from Sahara Avenue. All proposed site modifications are in conformance with the requirements of Title 19.

- **Landscape Plan**

The landscape plan indicates that new landscape material will be added to the southern buffer area, portions of the west and east landscape buffers, along the new porte cochere and within 11 proposed parking lot landscape islands within the southern parking lot area. One, five and fifteen-gallon size shrubs and ground cover will be utilized within the landscape buffers and parking lot landscape islands, and conform to the requirements of Title 19.12. The landscape plans indicate that the remainder of the site, which includes the north parking lot area, and landscape buffers towards the rear of the property, will remain as approved through Site Development Plan Review (SDR-4551).

- **Elevations**

The elevations submitted depict the portions of the southern and eastern façades to be remodeled, as well as the new shade structures to be added. The southern façade of the existing building will receive an updated metal entry element, constructed of a curved black metal panel system with red accents, revise portions of the existing storefront glazing, and place a new metal porte cochere at the east portion of the building.

The new metal porte cochere will mirror the curved angle of the existing roof line and be painted to match the existing metal roof. The east façade of the existing building will be affected by the new porte cochere, with the placement of four new red colored columns to support the structure. This shade structure will cover the existing service drive area and proposed vehicle display pads, and will be architecturally compatible with the existing building on site. The proposed porte cochere along the southern façade of the building will be an oval shaped canopy supported from a central pole and be located directly in front of the southern main entry.

The seven vehicle shade structures to be placed within the southern parking lot area will be supported by a central column at the back of the structures, and be streamlined in design. The remaining portions of the east, west and north facades will remain as approved through Side Development Plan Review (SDR-4551), and the existing building height will not be affected by the proposed improvements.

- **Floor Plans**

The floor plans submitted depict minor modifications made to the existing interior space, featuring an expanded showroom area. Renovations include relocated sales offices, management offices, and reception areas. The square-footage of the existing building will remain as approved through Site Development Plan Review (SDR-4551), and no expansions will be made.

FINDINGS

In order to approve a Site Development Plan application, per Title 19.18.050 the Planning Commission and/or City Council must affirm the following:

1. “The proposed development is compatible with adjacent development and development in the area;”

The proposed Major Amendment to an approved Site Development Plan Review (SDR-4551) is compatible with the surrounding uses and development in the area.

2. “The proposed development is consistent with the General Plan, this Title, the Design Standards Manual, the Landscape, Wall and Buffer Standards, and other duly-adopted city plans, policies and standards;”

The proposed development is consistent with the General Plan, Title 19 and the previously approved Site Development Plan Review (SDR-4551), as conditioned.

3. “Site access and circulation do not negatively impact adjacent roadways or neighborhood traffic;”

The site is accessed from Sahara Avenue, a 100-foot Primary Arterial, and Lindell Road, an 80-foot Secondary Collector, according to the Master Plan of Streets and Highways. This proposal will not negatively impact adjacent roadways or neighborhood traffic.

4. “Building and landscape materials are appropriate for the area and for the City;”

The building and landscape materials are appropriate for the area and for the City as conditioned. Compliance with the quantity of landscape material provided through Site Development Plan Review (SDR-4551) has been conditioned, as well as the requirement to indicate the materials utilized for the proposed shade structures and porte cocheres.

5. “Building elevations, design characteristics and other architectural and aesthetic features are not unsightly, undesirable, or obnoxious in appearance; create an orderly and aesthetically pleasing environment; and are harmonious and compatible with development in the area;”

The proposed building elevations and design characteristics are aesthetically pleasing and architecturally compatible with the existing building and the surrounding neighborhood.

6. “Appropriate measures are taken to secure and protect the public health, safety and general welfare.”

This proposal will not impact public health, safety or welfare since the development will be subject to the International Building Code and City inspections during construction.

PLANNING COMMISSION ACTION

The Planning Commission amended condition #3 as shown, to which the applicant agreed. There was one speaker in protest of this project at the meeting.
