1. Fire apparatus are large and unique vehicles, and it takes a driver with special skills and knowledge to operate such apparatus safely and appropriately. Currently, the fire departments for the City, Henderson and NLV each provide separate Emergency Driver Training courses for those fire department personnel that operate such apparatus.
2. The Fire Chiefs for the City, the County, Henderson and NLV believe the jurisdictions can save time and money by jointly providing emergency driver training, as well as provide standard and consistent emergency driver training instruction across the Las Vegas valley to the drivers of such fire apparatus.
3. Nevada 277.180(3)(d) permits "the joint and cooperative use of fire-fighting and fire-protection equipment for the protection of property and the prevention and suppression of fire," and the safe operation of such equipment by the Parties is necessary for the protection of property and the prevention and suppression of fire. The Parties will participate in this multi-agency emergency driver training and education to enhance safe-driving by all valley firefighter personnel responsible for driving fire apparatus during emergency and non-emergency calls and incidents, and to provide such personnel with the proper skills for safely and reasonably driving emergency vehicles.
