Revised: SUP-42262 and SUP-42264 Special Use Permit Auto Repair (major) and Motor Vehicle Sales (used) on site located at 1735 and 1715 Fremont Street

Dear Sir/Madam;

Please consider concurrent requests for use permits for on parcels 139-35-315-006 and 007. The combined parcels total 1.87 acres located at the north west corner of Fremont Street at Bruce Street. These two parcels with three buildings functioned as a singled destination for auto related businesses. Currently one of the three on-site buildings operates as a minor auto repair facility. Approval of this request will enable the revival of a cohesive site with shared parking and shared entrances. Following approval of these permits the parcels will be merged. The internal fencing that bifurcates the site will be removed to facilitate internal circulation.

Since the previous businesses began operations on the site, the adoption of the Downtown Centennial Plan has implemented new design standards on the site. The applicant has redesigned the on-site parking to accommodate parking lot landscaping, reserved room for large trees within the site and will replace chain link perimeter fencing with fencing allowable by Title 19. Decorative shrubs and trash bins will be placed along the street-side fencing. Internally, an iron fence separating the parking area to a sub-grade ramp will replace the existing chain link fence. This renovation will mitigate the appearance of the service bays that face Fremont Street. Trash bins will also be screened from public streets.

The applicant wishes to defer any major changes to landscaping and fencing along Fremont Street until the roadway expansion and any needed RTC dedications are underway. Also, the applicant wishes to have one year to from the time of occupancy to install the internal landscaping.

Minor changes will be made to the buildings and site to update the appearance and conform to the Centennial Plan. At this time, the proposed changes include, removing weathered canopies, replacing perimeter fencing with block wall and gate, replacing internal chain link fence with three foot wrought iron fencing adjacent to the downward ramp and replacing worn step rails. Tenants will submit designs for canopies over the bay doors as part of a subsequent master sign submittal. If possible, these canopies will screen the HVAC equipment. All temporary structures not in compliance with code will be removed.

REVISED

The anticipated uses include auto repair (major), auto repair (minor) and motor vehicle sales (used). Standard title 19 guidelines require 92 on-site spaces for the combined uses in addition to those needed to accommodate car sales. As this site is in the East Village District, Title 19 standards do not apply. Once landscaping is designed into this site, 57 spaces are available for parking. 12 additional spaces located in the rear portion of the site will be allocated to storage of disabled vehicles. This parking aisle will be screened by 6' gabions painted blue to match the auto sales building. The motor vehicle sales will have priority for the 19 streetside spaces.

At this time the following use permits are requested:

Motor Vehicle Sales (used): This use is requested 1715 Fremont Street. The building meets the Special Use requirements listed in Title 19 in that 1) a minimum 25,000 square feet is designated to this use (11,740 indoor). 2) No outside address system is proposed 3) While outdoor lighting is shared with the companion parcel it does not affect neighboring property owners 4) The property has sufficient indoor area to house automotive parts. 5) The automobile service bay doors are setback from the show-room building restricting visibility from Fremont Street. The service bays are not visible from Bruce Street due to the placement of a building on the companion parcel.

Auto Repair Garage, Major: The northernmost building (1735 Fremont suite 100) is proposed for major auto repair. This building was chosen because it is set back furthest from the right of way and has service bays that are oriented away from residential, schools or third party businesses. Any noise generated by this use is cushioned by the companion buildings. Major auto repair on this site can meet minimum special use requirements with the exception of:

- 1) **Waiver:** The opening of the service bays face public right-of-way. This building was constructed prior to this provision in code. The visual impact of these bays is somewhat alleviated by the 180 setback from the curb and the location of the entry which is approximately five feet below grade. The ramp leading to the entry mandates a safety fence which will be decorated with plant material.
- 2) **Waiver:** Vehicles parked on premises for the purpose of sale. As previously mentioned this building was designed as a companion to two other buildings. With the concurrent proposal for used auto sales in a separate on-site building, the two buildings will have shared access and shared parking. Following a parcel merger all three businesses will be located on the same property. Thus, this requirement cannot be met. The land lord will allocate streetside parking spaces to the auto sales business per a rental agreement. It is important to note that the auto-sales operation is a different business entity than the auto repair. The auto repair business will not park cars on this lot for the purposes of auto sales.
