Re: Case VAR-33762

Dear Sir or Madam:

As the owners (since 1987) of nearby property, my wife and I strongly oppose Variance V-33762 that requests increased wall height tolerances on property at 1640 S. Tenaya Way, Las Vegas. Our current zoning restrictions are for the protection of all the residents of the neighborhood and should not be amended so one individual can impose their personal ambitions on the quality of life of the surrounding residents.

These setback guidelines and building height restrictions existed before the variance applicants bought into the neighborhood and were clearly published on county records. We and other current residents abided by them and these new owners should comply like the rest of us have. As far as I can tell, adding 12-foot high walls would make this property look like a fort, completely out of character with the rest of the neighborhood.

Please stand strong and maintain the zoning restrictions for the protection of the entire neighborhood and say "No" to V-33762.

RECEIVED
APR 20 2009

Thank you.

Sincerely,

Stephen E. Trent

Frances M. Trent

TO: Planning and Development Dept.
Development and Services Center
731 S. Fourth St.
Las Vegas, NV 89101

SUBJECT: Variance 33762 for residence at 1640 S. Tenaya Way

We request that the subject variance be denied for the following reasons.

1. The area around the variance site is mostly custom homes occupied by thier original owners. We followed the construction rules including wall heights. The owner for the variance request should have reviewed the codes and rules before purchase.
2. The proposed wall height is compltely out of aesetic chraracter of the neighborhood.
3. A wall height beyond code will detract from the neighborhood ambience resulting in lower property values.

Thank you for your consideration.

MAY 01 2009

Dear Neighbor,

Recently you have expressed your opposition to the variance of the increased wall height in the front yard of my property. We value your opinion and would like to ask a minute of your time to review the information below. I have purchased the currently vacant building on the corner of Tenaya Way and Doe Ave. and would like to remodel it and build an addition to the house in such a way that it would be aesthetically pleasing and would increase the value of my and other properties in the neighborhood.

One particular issue I am facing with this property is that the front entrance and driveway to the existing home are located on the side street (Doe), however based on the zoning rules, my "front" yard is the one facing Tenaya. Working with my architect we found it impossible to relocate the orientation of main entrance and driveways, so now I have the "front" yard that can't be used for any of the typical entrance elements, but if left open would greatly reduce privacy and security of my residence.

Thus we tried to find a potential use for that large "front yard" area. First thing that came to mind was a day-time tennis court. That would have required 8 foot tall solid wall and additional 4 foot sports fencing to keep balls from flying away. Hence the City mailer described it as a request for a 12 foot tall wall, which naturally would be objected by reasonable person.

After the review of your objections and talking to city commissioners, we have decided to eliminate the proposed tennis court and use that "front yard" area for landscape and garden. We have removed sports fencing from the proposed drawings, and in addition, we have pushed the proposed wall location back 6 feet from the property. This would allow me to plant large trees in front of the wall to enhance the view of the entire street (I will relocate at least 5 mature trees from the back of my property). Although this design would still require a variance for an 8' foot wall within a "front yard" setback, you can see that the proposed design would actually greatly enhance the neighborhood, not take away from it's values.

With the above in mind, I would like to ask you to reconsider your opposition to my variance request, and I am looking forward to become a part of this great neighborhood.

Dear Neighbor,

Recently you have expressed your opposition to the variance of the increased wall height in the front yard of my property. We value your opinion and would like to ask a minute of your time to review the information below. I have purchased the currently vacant building on the corner of Tenaya Way and Doe Ave. and would like to remodel it and build an addition to the house in such a way that it would be aesthetically pleasing and would increase the value of my and other properties in the neighborhood.

One particular issue I am facing with this property is that the front entrance and driveway to the existing home are located on the side street (Doe), however based on the zoning rules, my "front" yard is the one facing Tenaya. Working with my architect we found it impossible to relocate the orientation of main entrance and driveways, so now I have the "front" yard that can't be used for any of the typical entrance elements, but if left open would greatly reduce privacy and security of my residence.

Thus we tried to find a potential use for that large "front yard" area. First thing that came to mind was a day-time tennis court. That would have required 8 foot tall solid wall and additional 4 foot sports fencing to keep balls from flying away. Hence the City mailer described it as a request for a 12 foot tall wall, which naturally would be objected by reasonable person.

After the review of your objections and talking to city commissioners, we have decided to eliminate the proposed tennis court and use that "front yard" area for landscape and garden. We have removed sports fencing from the proposed drawings, and in addition, we have pushed the proposed wall location back 6 feet from the property. This would allow me to plant large trees in front of the wall to enhance the view of the entire street (I will relocate at least 5 mature trees from the back of my property). Although this design would still require a variance for an 8' foot wall within a "front yard" setback, you can see that the proposed design would actually greatly enhance the neighborhood, not take away from it's values.

With the above in mind, I would like to ask you to reconsider your opposition to my variance request, and I am looking forward to become a part of this great neighborhood.
