Re: GPA-34610 ZON-34611 SDR-34612  
Existing 319-Foot Radio, TV or Microwave Communication Tower

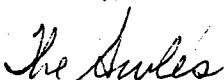

We have received several notices regarding the above proposed amendment, rezoning request and plan review. We have lived at our present address, in close proximity to the tower site, since December 1999. During that time we have had to add filters to every phone in our home, and to our intercom system. The radio station comes over our intercom loud and clear, making it almost impossible to hear what anyone says over our intercom system until we installed a filter. The filter makes it slightly more tolerable but with a filter it is hard to understand what anyone says on the intercom, and we can still hear the station. It is the same with our phones although the filters pretty much solved the problem.

Our complaint is that the radio tower is not doing everything they can to make sure they do not impact the residents in transmitting programs, such as our intercom problem. We have had the filter problem addressed several times hoping to find a filter that works well but have had no luck with that. It was our understanding that the FCA had specific rules for stations to avoid impacting the residents in their homes. However, this is a misunderstanding on our part, or it is being ignored.

The Tower Site is surrounded on three sides by residential housing. We also think it is a mistake to do any type of amendment or rezoning that locks the station to this site.

Thank you for your attention to the above matter.

Sincerely,

  
The Soule's
