None); (Did Not Vote-None); (Excused-None)

Minutes:

By way of reading the item, CHAIR TROWBRIDGE declared the Public Hearing open.
However, under Item 10, he verified with those in the audience that there were no comments
from the public for this item.

FLINN FAGG, Planning and Development, explained that this Population Element was
originally drafted and approved in 2003. Along with updating the figures and reorganization,
staff has included four recommendations: 1) estimate the City's population on an annual basis, 2)
lead and participate in regional annual population projection programs, 3) lead and coordinate
local Census programs and 4) monitor population change on an annual basis, as it applies to
levels of service standards established in accordance with the City of Las Vegas 2020 Master

PLANNING COMMISSION MEETING OF: DECEMBER 17, 2009

Plan. As the City budgets for an ever growing population, it is important to monitor accurately how the City grows, how these services are provided and to budget accordingly.

CHAIR TROWBRIDGE asked if the Census data information will be broken down by wards, which could assist in addressing some of the other Master Plan Elements that are based upon population, such as the Parks Element. MR. FAGG replied that once the information is received, it will be incorporated into the various planning areas to account for levels of service, such as parks and public safety. He also explained for COMMISSIONER TRUESDELL that the City, in conjunction with the other local entities, does a population estimate on an annual basis. The information is forwarded to the State demographer, who then certifies the population estimate.

By way of reading the item, CHAIR TROWBRIDGE declared the Public Hearing closed.
