RE: Application ZON-40051
Assessor's Parcel Number 125-25-201-001

Dear Mr. Gebeke:

In regard to this parcel, staff has determined that the existing General Plan designation and zoning classification are inconsistent with possible future development. In order to resolve this inconsistency and ensure that future development is compatible with existing development, staff is proposing to change the zoning district of the site to C-V (Civic). Please call me at 229-4693 with any questions.

Justification Letter

The property located at 7501 West Alta Road (apn # 138-34-301-003) has operated as a self-serve carwash for over 13 years. It sits on approximately 1 acre of land and has 6 car wash bays and 6 vacuums bays. Approximately two and a half years ago Community Bank foreclosed on the property and shut the business down. The "Use Permit" expired March of 2009, I have purchase the property subject to the "Use Permit" being renew for the exiting Self-Serve Car Wash. I would be requesting Waivers to the Minimum Special Use Permit requirements as follows:

1. Hours of operation 7am to 10Pm to 24/7
2. Opening bays to the street / existing
6. The use must not be within 200 feet of residential property / existing
9. The business must be operated in conjunction with another motor vehicle related Smog inspection, minor auto repair etc… I would like to do Smog inspections.
10. An attendant must be on the premises all times the equipment is operational. / Attendant 6 hours 7 days a week

Presently my company operate 10 self-serve car washes it the Las Vegas area and would like the opportunity to re-establish the Use Permit to operate this business again.

Re: Special Use Permit with separation waivers a Supper club within Tivoli Village
Parcel 138-32-601-003. Silk, 400 S Rampart, #190

Dear Sir/Madam;

Please consider this request to allow a Tavern within a previously approved mixed use development (SUP-5853). The site is located within a 29 acre commercial and residential development located at the northeast corner of Alta Drive and Rampart Boulevard. Specifically, Silk is a grade level establishment located adjacent to the arcade feature that decorates the area next to the Rampart/Alta intersection.

Silk, is a Spanish themed restaurant that will serve Tapas, Sangrias, beer and other forms of Liquor. The floor plan offers patrons the choice of three seating environments. An indoor seating area is open to all patrons including families, a lounge area is available to patrons 21 years and older, and cortile/patio dining can be accessed by first traversing through the restaurant. This patio area is shaded by the arcade feature. As proposed, Silk meets Title 19 requirements for a supper club including seating capacity, kitchen hours, staffing levels, and restaurant/lounge separation. The parking allocation for this restaurant is grandfathered into the project-wide parking agreement. Please reference VAR-10773 that approved 3,955 spaces where 4,961 would otherwise be required.

This application requires a waiver of separation distance to allow less than 400 feet from the property line of the subject parcel to the property line of the nearest city park. The Tivoli Village mixed use development is situated on a parcel on which the north easternmost corner measures 141 feet from a playground within Angel Park (138-32-501-003). It is important to note that the commercial portion of this 30 acre parcel is on the westernmost side of the mixed use area. Consequently approximately 560 feet of mid-rise residential development is situated between the commercial portion of Tivoli Villages and the subject playground. It is also notable that there are two barriers between this park and Tivoli Village. The first is an approximate 600 foot fence along the northern boundary of the property. The second is a drainage channel that is more than 20 feet deep. As a result, a pedestrian must walk 1655 feet to the park while there is no direct vehicular access. For this reason, the park is suitably protected from this supper club.

JUSTIFICATION LETTER

RE: STRUTN/1911 Stella Lake, Las Vegas NV 89106
Reference License # S07-98337-3-150332

Ashley Chaney will be utilizing an existing retail space in our building. The small space is currently used for retail sales and operates under an existing retail sales license #B08-008363-2-095811, which has been in place since October 2006 and was provided as part of our pre-application processing.

Ashley Chaney is affiliated with Expertise and will be managing the retail space. She will expand the current inventory to include other women's accessory items and will report those sales separately for the purpose of taxation and inventory control. She completed the State Business License process and has followed the requirements for Nevada business taxation.

Since our opening in 2006, we have incubated Gritz Café by providing tenant improvements to support bringing this new business establishment to the Westside community. We feel by supporting our retail sales manager in developing her business skills, we are providing a valuable service for this graduate of our school who aspires to develop her business management skills. By having her manage a portion of the inventory, complete related sales tax reporting, we are contributing to her development much like a business incubator project.

We see the expansion of the merchandise as a way to stimulate our existing retail operation by responding to our students' and salon clients' request for new products. The customers will be the same individuals, primarily our students and customers of the beauty school which operates in the majority of the building's square footage. We also expect to attract clients of the Gritz Café, which is also domiciled in this building and the holder of a city Business License.

The retail space has been highlighted on the site plan and, as noted is an estimated 225 SF of the overall 10,000 SF facility. For this reason, we do not anticipate an increase in foot traffic or vehicular traffic since these clients are already being served at this site. Further, no permanent exterior signage will be attached to our building, as we see the existing clients as our target market. Additionally, no interior modifications or construction is being undertaken.

The following summarizes the key factors:

- Existing retail sales license
- No change to the structure
- No exterior attached signage
- Space dedicated to retail sales is approximately 3% of the overall square footage of the building
- Clients are from our existing students and clients and customers of Gritz Café (SUP-18298) which operates under an existing city license in a portion of the building.

The story of The Village

The story of ***The Village at Queensridge*** *began to unfold with the first initial architectural concept—to create an urban community built on a solid foundation of legacy and integrity, with an authentic Old World feeling. Solid craftsmanship, traditional materials and artisan-inspired qualities permeate the architecture and combine to provide a unique and memorable environment for residents and visitors alike.*

Old World inspiration combined with artistry and craftsmanship meet the contemporary lifestyles of vibrant people at The Village

Project District Plan

Il Palio, a centuries-old athletic contest in Sienna Italy, was the inspiration for **The Village's** *districting plan. Il Palio is fought between the Contrades (city wards), of Sienna and encourages civic pride by commemorating an event or tradition in history. During this annual contest both horse and rider are dressed in the colors and coat-of-arms of the Contrade they represent. A magnificent pageant is held prior to the festivities where each Contrade is represented with their own unique colorful banners and costumes.*

Borrowing the idea of graphic crests and unique colors as identifiers for areas (or districts) blends Il Palio's rich history within **The Village.**

Throughout our history, graphic crests and coat of arms have been used to identify villages and areas.

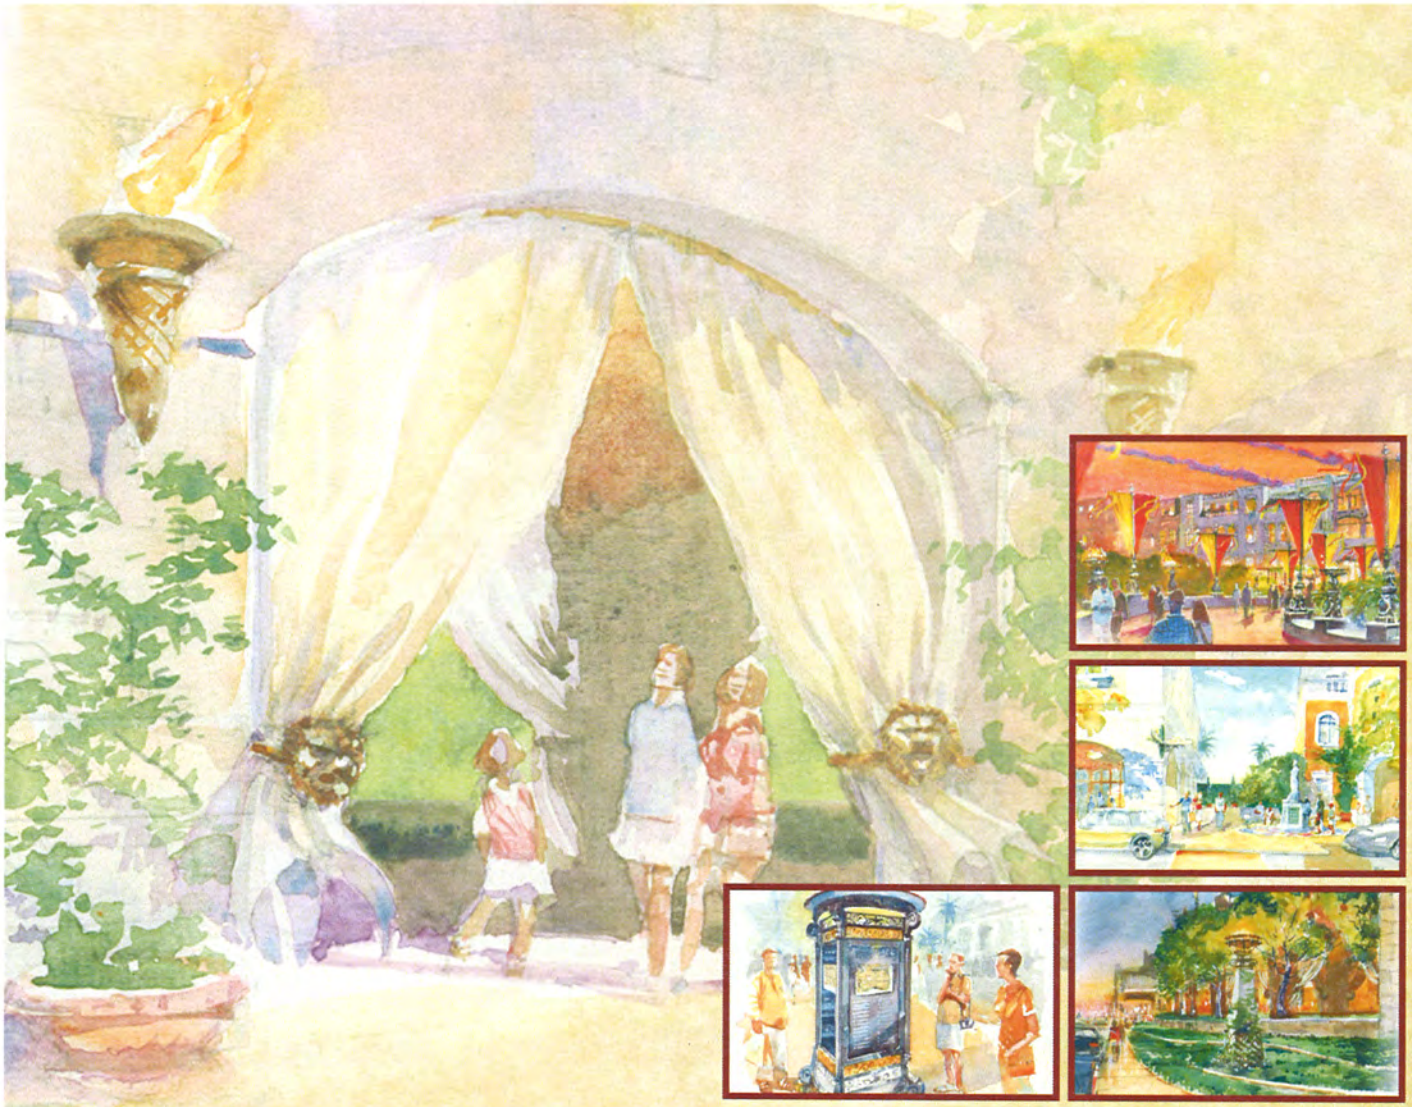

Graphics – creating a sense of place and a sense of connection

Project Design Intent

Our goal is to create a sense of place and an identity that are truly unique to ***The Village at Queensridge****. We will continue telling the project story—that this will be a vibrant community built on a solid foundation of legacy and integrity. The use of environmental graphics will enhance the environment, not overwhelm it. We will add an additional layer to the project that connects on a human scale at multiple sensory levels, accomplished through the use of both touch, sight and sound—establishing an emotional connection to* ***The Village*** *for all who visit. These graphic components will take on various forms that will help direct, orient and decorate.*

Old World artistry and craftsmanship will be found throughout the project and will transcend into all graphic components as well. These items will appear as if they were built over time from quality materials such as wrought iron, cast metal and carved stone. These items will feel real and have a level of authenticity not commonly found in the Las Vegas market. The graphic components will be a continual thread, a family of items that will become recognizable yet blend perfectly in the environs.

3. The fabricator shall submit qualifying data to owner for approval.
4. The fabricator may make recommendations and/or changes to the details and use of materials as shown on the drawings. Such recommendations shall include the substitution of materials as indicated on the design drawings based upon previous fabrication experiences or as a value engineering exercise. Fabricator recommendations and suggestions are encouraged to achieve the highest quality product. All recommendations and/or suggestions must be approved in writing by the project manager (designer) prior to shop drawings or fabrication of prototypes (if necessary) or samples.
5. The fabricator shall base his proposal on the performance of all services, including all labor, materials and equipment for the complete fabrication and installation of the product at the agreed upon schedule.

B. Dimensions

1. Written dimensions on the drawings shall take precedence over scaled dimensions. Fabricator shall verify and be responsible for all dimensions and conditions shown by these drawings and shall be responsible for confirming all field dimensions and conditions prior to beginning fabrication.
2. Locations of signs shown on the plans are for general information. The fabricator shall confirm each sign location with the Owner and general contractor.

C. Execution

1. Fabricator shall notify the designer of any discrepancies in the drawings, in field dimensions or conditions, and/or changes required in construction details. All discrepancies shall be brought to the attention of the project manager.
2. Sign fabricator shall provide all internal/external sign components such as transformer, light source, wiring, fixture receptors, and internal reinforcing as an integral unit. GC shall provide electrical service as required.

D. Contractor Responsibility

1. Review shop drawings, product data and samples as included in the submittals.
2. Verify field measurements, field construction criteria, catalog numbers and similar data.
3. Do not begin work until the corresponding submittals have been reviewed and approved.

E. Artwork

Artwork will be submitted as a laser printout in a scaled percentage of the final size or in the form of a Windows based compact disk. Artwork will be provided for symbols, logos and custom-designed graphic components. The artwork provided will not be color-separated nor will it provide for trapping, overprinting or other requirements specific to the reproduction method. All enlarging and reducing is the responsibility of the signage contractor. Refer to the design development drawings for reference as to what artwork will be provided.

F. Labels

There shall not be any visible labels on the completed signs unless required by law.

G. Mock-ups

Provide visual mock-ups, for review and approval if required.

H. Inspection

The sign contractor shall examine the substrates and conditions on which the signs are to be installed and notify the owner's designated representative in writing of conditions that would impede the proper and timely completion of the work. Do not proceed with the work until all unsatisfactory conditions have been remedied.

I. Delivery, Storage, and Handling

1. Pack, wrap, crate, bundle, box bag or otherwise package, handle, transport, and store all fabricated work as necessary to provide protection from damage by every cause.
2. Protect surfaces and edges of door and wall plaques from damage. Maintain acrylic plastic manufacturer's original protective sheet on face of plaques or replace with new protective covering. Identify "up" side of plaques. Package each plaque individually and in similar groups. Identify each package.

J. Warranty

1. Warrant work against failure because of faulty materials, workmanship, and design for a period of three years from date of substantial completion.
2. Fading, cracking, warping, peeling, delaminating, rusting, corroding and structural failure, including distortion, will be construed to mean failure because of faulty materials and workmanship.
3. Failures during the warranty period shall be repaired or replaced to the satisfaction of the Owner.

K. Submittals

1. Shop drawings

   c.) Review of shop drawings will be done in a timely manner by the designer and Owner so as not to delay the work.

   d.) The sign contractor shall make any changes indicated by the designer and Owner and resubmit the shop drawings for final approval. Approved shop drawings must be received by the fabricator before fabrication can start.

   e.) Shop drawings will be reviewed for compliance with design intent only. The sign contractor is responsible for all other aspects of fabrication including engineering, procedures, installation techniques and performance, as well as coordination with site contractors and related trades.

2. Product Data

   a.) The contractor shall submit manufacturer's technical data and installation instructions for each type of sign or fixture required for the finished and installed unit.

   b.) The contractor shall supply specific samples as requested on the drawings. The fabricator shall submit three (3) samples of each material in the finish and texture specified and each paint color on the material and in the finish specified on the drawings. Minimum size shall be 3"x3". Samples should be submitted in ample time to allow adjustments and resubmits without causing delay to the project.

   c.) The fabricator shall provide the Owner with complete care and maintenance instructions for the installed pieces.

   d.) The fabricator shall provide the Owner with one half-pint can of touch-up paint of each type and color used.

- Obelisk will be too heavy - to be removed?
- DDG suggests that the obelisk and sculpture is needed as an iconic feature for the Rampart Courtile - it will define the area. It will be one of many "photo opportunities" within The Village - people will remember this.
- DDG suggests using clad stone and a lighter weight material for the sculpture - or perhaps reducing the size of the obelisk?

Sign Type: 60.11

- Crest medallion to be fabricated with cut stone - too small to be carved from stone.
- Crest to fit within the inner rectangular space - so stone frame/border will not have to be cut.
- Frank suggested incorporating the English translation for the area names...DDG suggests keeping Italian only - this will be consistent with other sign items where Italian is used, such as the street signs.

- NO formed plastic, injection molded plastic or box-type back lighted panel signs are permitted.
- NO flashing, chased lights will be allowed.
- NO sign makers' labels or other identification shall be permitted on the exposed surfaces of a sign. Exception: those required by local ordinances, mounted as inconspicuously as possible.

MSP-40230

• NO paper signs, handwritten signs, and stickers applied directly to storefront glazing are permitted.

• NO exposed raceways, conduits, tubing, conductors, transformers or other electrical equipment will be permitted.

a) STOREFRONT & WINDOW SIGNAGE

• Sign shall be integral with the storefront design, and sign size shall be proportional with storefront elements. Sign shall be no more than 25% of the storefront width, or 8' in length.

• Height of letters will be a function of the available length of the sign and the name of the Tenant, but maximum letter height will be 12" (unless otherwise stated for a specific location).

• Signage shall be limited to trade name, logo as defined in the lease, and decorative accents.

• NO exposed neon or lamps will be allowed at storefront signage.

• Storefront signage must be illuminated through concealed methods or by remote fixtures attached to the storefront or building façade. Lamps are to be shielded from view.

Storefront or Building Facade

All Tenants are required to have a single ILLUMINATED SIGN integral to their storefront (and/or for stores with covered arcades, a single ILLUMINATED SIGN on the building façade) that fits one of the following:

• Edge-lit: Etching must be "V" cut. Concealed light source must be highly illuminated to ensure visibility against a light background.

• Back-lit ("halo" effect): individual logo or letters against an opaque background.

• Painted: letters face illuminated with remote fixtures.

• Pin Mounted: letters on base with remote external illumination.

• Internally illuminated sign cabinet with routed-out, push-through letters.

Surface Illuminated Sign

• Materials: carved and/or painted wood, ceramic tiles with raised letters, carved stone, and forged, cut-out or cast metal letters.

• Sign must be brightly illuminated from remote light source which does not cause glare to the public.

Window Graphics

Tenants may apply signs to the glass portion of the storefront.

• Signage must not obscure view through glass, and shall be limited to trade name and/or logo.

• 4" maximum letter size and shall not be higher than 4'-0" from finished floor.

• Acceptable materials:

- Painted gold or silver leaf

- Silk-screened logo

- Cut or polished metal veneers applied to glass

- Etched or Sandblasted glass.

MSP-40230

• Prohibited materials:

- Paper or poster card taped to glass.

- Vinyl letters.

- Product Decals are not permitted.

Upper Level Windows

Landlord requires upper level windows be fully utilized as display features for the Tenant. Signage or graphic design on these windows will be considered on a case by case basis by Landlord.

b) FAÇADE SIGNAGE

For Tenants where covered arcades DO NOT occur in front of their storefronts, signage shall be mounted on the facade (or on the Landlord-provided sign brackets, if provided) above or adjacent to the store, above Tenant's awnings or canopy.

For Tenants where covered arcades DO occur in front of their storefronts, signage shall be mounted on the facade (or on the Landlord-provided sign brackets, if provided) above or adjacent to the store; signage integral to the Tenant's storefront design may also be provided, subject to Landlord's approval. Signs between the top of the storefront and the underside of the arcade ceiling will not be allowed. (See TLOD for location, etc.)

• Illumination will be provided by the Tenant with power connected to Tenant's service.

• Signage is limited to the trade name only. One sign is permitted per Tenant, unless the store has a corner location (Then one sign per each facade is permitted).

Facade Signage Options

• Individual letters, pin-mounted to the façade (or mounted to the Landlord-provided sign brackets, if provided.)

• 2-dimensional, 3-dimensional or open channel type lettering.

• Lettering affixed to or integral with a panel which is erected at the facade within the allotted signage area.

c) FAÇADE OR ARCADE BLADE SIGN

Facade-Mounted or Arcade-Mounted Blade Signs are intended to be fixed to sign brackets (supplied by the Landlord at Tenant's expense) at the facade of the building or the arcade ceilings at suitable locations. Refer to TLOD's for availability and locations of signs, etc.

• Though they are referred to as "blade" signs, their projection may occur as spheres, boxes, cylinders or any other combination of 3 dimensional objects and shapes.

• As projected awnings and canopies will be allowed by the Landlord for this project, the mounting height of the sign should be selected to avoid being obscured by the canopy, awning or awning frame.

• The Tenant is required to erect one blade sign at the facade of the building, adjacent to the premises, Where covered arcades occur, the Tenant is required to erect one blade sign in front of the premises on the underside of the arcade ceiling, not at the facade. Tenants at corner locations are permitted to install a sign at each face of the building or section of the arcade.

• 4'-0" maximum horizontal projection (including bracket) from face of building.

• Where covered arcades occur, a fixed vertical dimension of 3'-0" (including bracket) is required from underside of arcade ceiling to bottom of sign.

• Where blade signs are mounted to the building façade, a fixed vertical dimension of 9'-0" is required from grade to bottom of sign.

• Where blade signs are mounted to the building façade, a fixed vertical dimension is required from grade to bottom of sign for upper level Tenants. However, this height will vary depending on the building design and will be set by Landlord for each building.

• Width restrictions vary, dependent on whether sign is 2 sided blade or a 3 dimensional shape. Acceptable width shall be at Landlord's discretion.

• Illumination: Sign may be lit from lighting outriggers or with integral concealed lighting.

• In the event Landlord's facade is damaged during the installation of Tenant's blade sign, Landlord's contractor will make the repair at Tenant's direct expense.

• All upper level retailers who do not have store access from the ground level, but instead from upper level access walkways, should place their blade signs along the access walkway while locating their major façade sign on the outermost facade. As an alternative to a facade sign, retailers may have a sign within the upper level arcade facade opening or attach a sign to the upper level railing if a metal rail condition exists outboard of their store, or utilize a roof mounted sign if no façade exists above the 2nd level.

d) CANOPY TOP

• This signage type consists of illuminated signage which will sit atop, or be affixed to, the edge of the Landlord or Tenant-provided canopy which may occur at specific locations in this project.

• The Tenant must provide the signage. The finish, color and size of the lettering and/or logo is subject to the Landlords approval to ensure only the highest quality for the project. Light source and transformer shall be concealed from public view.

e) AWNING SIGNAGE

Should Tenant obtain Landlord approval for awnings, Tenant may provide signage or logo on awning valance only. Signage or logos shall not be permitted on the angled portion of awning.

f) TRELLIS & TOWER SIGNS

Trellis

• Signs are permitted where Tenants have a structured trellis, at the ground or upper levels, covering areas designated for Tenant's outside use.

• Non-illuminated signs of a scale and character appropriate to that location may be attached to the leading edge of the trellis.

Tower

• The architectural character of Tivoli Village as a Mediterranean town has resulted in approximately 30 towers of varied size and design being visible throughout the project. While signage on some feature towers is dedicated to expressing overall project identity, opportunities will exist for other tower elements to receive Tenant signage. The final location and design of any tower sign proposal must receive Landlord approval prior to fabrication and installation.

RE: Master Sign Plan Justification Letter
The Village at Queensridge (Tivoli Village at Queensridge)
Las Vegas, NV

Ladies and Gentlemen:

This letter will serve as the Justification Letter for the application for Master Sign Plan approval for the commercial portion of The Village at Queensridge (also known as Tivoli Village at Queensridge). The project is continuing as one of the few major mixed use developments in the western US, and is eagerly anticipated as a destination development for the western portion of the Las Vegas Valley.

Tivoli Village's old-world design takes its inspiration from authentic European style and architecture. It will include approximately 787,000 gross square feet of commercial space, which will be divided into retail, office, restaurant and entertainment use.

In addition, 340 condominium units are permitted for the project, increasing the pedestrian energy. The residential area signage will be submitted as a revision to the overall Master Sign Plan at a later date, and we anticipate that all residential area signage will be in compliance with Title 19 requirements.

This urban mixed-use center will also feature pedestrian-friendly streets with stone paved walkways, scenic landscaping design, and convenient amenities such as an integrated below-ground parking structure with direct access to the surrounding shops. Limited above-ground parking will also be available, adding to the center's metropolitan vibe without disturbing the pedestrian experience.

The mix of uses will result in activity in the center from early morning office uses, daytime shopping and casual dining, to evening dining at outstanding restaurants that encourage patrons to linger in one of the many beautifully decorated outdoor dining terraces. Hundreds of direct and indirect jobs will be created by this significant source of economic activity.

The project is adjacent to the Alta Drive bikeway, the Angel Park Trail, and bus pullouts have been constructed on both Alta and Rampart. Bicycle parking will be provided, and water friendly landscaping materials are being used. Five vehicle entrance and exit points ensure smooth traffic flow, and valet services are provided for customers. Light reflective roofs are used to reduce heat absorption, and high insulation values are used in all exterior walls.

Upper Level Windows

Landlord requires upper level windows be fully utilized as display features for the Tenant. Signage or graphic design on these windows will be considered on a case by case basis by Landlord.

b) FAÇADE SIGNAGE

For Tenants where covered arcades DO NOT occur in front of their storefronts, signage shall be mounted on the facade (or on the Landlord-provided sign brackets, if provided) above or adjacent to the store, above Tenant's awnings or canopy.

For Tenants where covered arcades DO occur in front of their storefronts, signage shall be mounted on the facade (or on the Landlord-provided sign brackets, if provided) above or adjacent to the store; signage integral to the Tenant's storefront design may also be provided, subject to Landlord's approval. Signs between the top of the storefront and the underside of the arcade ceiling will not be allowed. (See TLOD for location, etc.)

• Illumination will be provided by the Tenant with power connected to Tenant's service.

• Signage is limited to the trade name only. One sign is permitted per Tenant, unless the store has a corner location (Then one sign per each facade is permitted).

Facade Signage Options

• Individual letters, pin-mounted to the façade (or mounted to the Landlord-provided sign brackets, if provided.)

• 2-dimensional, 3-dimensional or open channel type lettering.

• Lettering affixed to or integral with a panel which is erected at the facade within the allotted signage area.

c) FAÇADE OR ARCADE BLADE SIGN

Facade-Mounted or Arcade-Mounted Blade Signs are intended to be fixed to sign brackets (supplied by the Landlord at Tenant's expense) at the facade of the building or the arcade ceilings at suitable locations. Refer to TLOD's for availability and locations of signs, etc.

• Though they are referred to as "blade" signs, their projection may occur as spheres, boxes, cylinders or any other combination of 3 dimensional objects and shapes.

• As projected awnings and canopies will be allowed by the Landlord for this project, the mounting height of the sign should be selected to avoid being obscured by the canopy, awning or awning frame.

• The Tenant is required to erect one blade sign at the facade of the building, adjacent to the premises, Where covered arcades occur, the Tenant is required to erect one blade sign in front of the premises on the underside of the arcade ceiling, not at the facade. Tenants at corner locations are permitted to install a sign at each face of the building or section of the arcade.

• 4'-0" maximum horizontal projection (including bracket) from face of building.

• Where covered arcades occur, a fixed vertical dimension of 3'-0" (including bracket) is required from underside of arcade ceiling to bottom of sign.

• Where blade signs are mounted to the building façade, a fixed vertical dimension of 9'-0" is required from grade to bottom of sign.

• Where blade signs are mounted to the building façade, a fixed vertical dimension is required from grade to bottom of sign for upper level Tenants. However, this height will vary depending on the building design and will be set by Landlord for each building.

• Width restrictions vary, dependent on whether sign is 2 sided blade or a 3 dimensional shape. Acceptable width shall be at Landlord's discretion.

• Illumination: Sign may be lit from lighting outriggers or with integral concealed lighting.

• In the event Landlord's facade is damaged during the installation of Tenant's blade sign, Landlord's contractor will make the repair at Tenant's direct expense.

• All upper level retailers who do not have store access from the ground level, but instead from upper level access walkways, should place their blade signs along the access walkway while locating their major façade sign on the outermost facade. As an alternative to a facade sign, retailers may have a sign within the upper level arcade facade opening or attach a sign to the upper level railing if a metal rail condition exists outboard of their store, or utilize a roof mounted sign if no façade exists above the 2nd level.

d) CANOPY TOP

• This signage type consists of illuminated signage which will sit atop, or be affixed to, the edge of the Landlord or Tenant-provided canopy which may occur at specific locations in this project.

• The Tenant must provide the signage. The finish, color and size of the lettering and/or logo is subject to the Landlords approval to ensure only the highest quality for the project. Light source and transformer shall be concealed from public view.

e) AWNING SIGNAGE

Should Tenant obtain Landlord approval for awnings, Tenant may provide signage or logo on awning valance only. Signage or logos shall not be permitted on the angled portion of awning.

f) TRELLIS & TOWER SIGNS

Trellis

• Signs are permitted where Tenants have a structured trellis, at the ground or upper levels, covering areas designated for Tenant's outside use.

• Non-illuminated signs of a scale and character appropriate to that location may be attached to the leading edge of the trellis.

Tower

• The architectural character of Tivoli Village as a Mediterranean town has resulted in approximately 30 towers of varied size and design being visible throughout the project. While signage on some feature towers is dedicated to expressing overall project identity, opportunities will exist for other tower elements to receive Tenant signage. The final location and design of any tower sign proposal must receive Landlord approval prior to fabrication and installation.

** STAFF REPORT **

PROJECT DESCRIPTION

This is a request for a Special Use Permit for a proposed 2,000 square-foot Motor Vehicle Sales (Used) use at 4561 East Bonanza Road, Suite #130. The subject property contains an existing 16,250 square-feet Auto Repair Garage, Major building and has been approved through Site Development Plan Review (SDR-25148) for a 19,500 square-foot General Retail and Restaurant building. In addition, the subject property has also received a parking Variance (VAR-25220) to allow 201 parking spaces where 250 are required. The applicant is proposing to convert a 2,000 square-foot storage area of the existing 16,250 square-foot Auto Repair Garage, Major building into a Motor Vehicle Sales (Used) use. Placing an additional use on the subject property, in addition to the existing and approved uses, will create an overly developed site and will negatively impact the surrounding neighborhood; therefore, staff recommends denial of this request. If this application is denied, the existing 16,250 square-foot Auto Repair Garage, Major building and use would remain.

ISSUES

- 4561 East Bonanza Road, Suites # 125 and # 145 have had permits issued, but were never finaled.
- The applicant currently has six code enforcement cases open at 4561 East Bonanza Road.
- Per Title 19.04 Minimum Special Use Permit Requirement # 7 for the Auto Repair Garage, Major use, no vehicles may be parked on the premises for the purposes of offering the vehicle for sale. Approval of this Special Use Permit request would circumvent this requirement of the previously approved Special Use Permit (SUP-3223).

ANALYSIS

The applicant is proposing to convert 2,000 square feet of an existing 16,250 square-foot Auto Repair Garage, Major into a Motor Vehicle Sales (Used) establishment. A previous Variance (VAR-25220) approved 201 parking spaces for a 16,250 square-foot Auto Repair Garage, Major, a 6,207 square-foot Restaurant, and 13,315 square-feet of General Retail where 250 parking spaces are required. The applicant was denied a previous a Special Use Permit (SUP-33611) for a proposed 1,000 Motor Vehicle Sales (Used) at this site on 04/23/09. This request would allow vehicle sales in conjunction with an Auto Repair Garage, Major, which was previously approved through Special Use Permit (SUP-3223). This would circumvent a Minimum Special Use Permit Requirement of that use that prohibits the display and sale of vehicles at an Auto Repair Garage, Major site. As such, staff cannot support this request and recommends denial.

FINDINGS (SUP-38523)

In order to approve a Special Use Permit application, per Title 19.18.060 the Planning Commission and City Council must affirm the following:

1. **The proposed land use can be conducted in a manner that is harmonious and compatible with existing surrounding land uses, and with future surrounding land uses as projected by the General Plan.**

   The proposed land use cannot be conducted in a manner that is harmonious and compatible with the existing and surrounding land uses, as the surrounding businesses within the subject property are high-volume uses, and over 20,400 square feet of additional uses have been approved for the site through Site Development Plan Review (SDR-25148). The surrounding parcels are residential and commercial in nature, and the proposed use will not be harmonious or compatible with the adjacent residential land uses, as the proposed use is too intense for the subject property.

2. **The subject site is physically suitable for the type and intensity of land use proposed.**

   The subject site is not physically suitable for the type and intensity of land use proposed, as evidenced by the approved Variance (VAR-25220) for parking. The isolation of this parcel from others zoned C-2 (General Commercial) creates a significant conflict with adjacent, less-intensely zoned properties.

3. **Street or highway facilities providing access to the property are or will be adequate in size to meet the requirements of the proposed use.**

Access to the site is provided by Bonanza Road, a 100-foot Primary Arterial as designated by the Master Plan of Streets and Highways, which will provide adequate access to the site. There is only one access driveway to the site with an emergency crash gate at the south end of the site, at Diamond Head Drive, a 60-foot Local Street, which will provide adequate emergency access. The subject property is also adjacent to Page Street, a 60-foot Local Street to the east; however, no access is provided to this roadway.

4. Approval of the Special Use Permit at the site in question will not be inconsistent with or compromise the public health, safety, and welfare or the overall objectives of the General Plan.

The proposed development is subject to permit review and inspection; therefore, appropriate measures will be taken to protect the health, safety and general welfare.

5. The use meets all of the applicable conditions per Title 19.04.

The proposed use meets all of the applicable conditions per Title 19.04; however, the request would allow vehicle sales in conjunction with an Auto Repair Garage, Major, which was previously approved through Special Use Permit (SUP-3223). This would circumvent a Minimum Special Use Permit Requirement of that use that prohibits the display and sale of vehicles at an Auto Repair Garage, Major site.

Re: JUSTIFICATION LETTER

To whom it may concern.

I am applying for a Use Permit for an Auto Sales at 4561 E. Bonanza Road, Las Vegas, Nevada 89110. The property is zoned as a C2 which is for a heavy mechanic repair of which is comparable with Use Permit of which I am applying for.

Further this is vital to me because at this time I have filed a chapter 11 bankruptcy and this will give more proof to the judge and trustees that I do intent to have future income.

Respectfully

Re: Justification Letter
Sky View Pines Family Apartments
21 West Owens Avenue, Las Vegas, Nevada

Dear Steve:

We are requesting a variance to reduce the amount of required parking spaces from 170 to 156.

The purpose of this request is to allow for the installation of traffic gates.

The original design did not include these gates because they would not fit with the design of the zoning criteria for parking. After meetings with adjacent property owners and Metro, it was determined that the inclusion of the gates was important to restrict unauthorized vehicular traffic onsite.

With the parking space reduction we believe that there will still be ample parking for the property. The income restrictions at Sky View Pines targets lower income individuals and families, and car ownership is doubtful. These income levels are lower than the adjacent property, Horizon Crest Family Apartments, and our records indicate there is less than .5 cars per apartment at that location. Therefore we believe that a parking ratio of greater than 1 to 1 is sufficient.

We are currently under construction on Sky View Pines, and expect to be complete by June 2011.

Please feel free to contact me at (702) 410-2706 if you have any further questions. Thank you.

To whom it may concern,

I, Jason Aungenett, have built an enclosed dry storage garage to house my seven vehicles due to recent vandalism and robbery that has occurred to my vehicles.

Unfortunately, I began construction prior to obtaining the necessary permits. I did not believe it was necessary to obtain permits as my neighbors have similar size properties and similar size garages. In which I was informed by them that they had not obtained permits for their garages.

I have been working diligently to comply with all requirements. I am requesting a variance because the size of the building exceeds fifty percent of the size of the main dwelling. As I had mentioned before the size of the garage is to occupy several cars, a twenty four foot trailer and a motor home that I plan to purchase in the near future.

Please allow me the opportunity for a proper hearing to propose my plans for my garage.

Kind regards,

Jason J Aungenett

To: The planning Commission of Las Vegas Nevada

I Teresa Garcia bought a house on 1240 south 10th street Las Vegas, Nevada. I have made some improvements to the property and some additions as well. This year I replaced the old existing carport with a better structure for stability and great appearance to the neighborhood. When I was finish, I was cited because I did not get a permit. I was under the impression that because I was just replacing the existing one a permit was not required. The front yard setback is fourteen feet and it suppose to be twenty; I took the time to ask my neighbors if they had a problem with the carport and if it block their view, and they responded that the neighborhood needs changes like mine. Please let me keep my carport.

Thank you. Teresa Garcia

Dear Mr. Frayer:

Re: AAction Loans
Proposed location 8414 Farm Rd # 130

Dear Romeo:

My intention is to open a third location for AAction Loans in the Las Vegas Area and the proposed location 8414 Farm Rd # 130 is the site I wish to open. My business provides Payday and Title Loans. I am inquiring about a waiver in regards to the 200 foot requirement for separation from residential and the 1,500 minimum space requirement for office space. Please review the following items listed below:

Existing locations:

1. 4850 W Sunset Rd # 110 LV NV 89118
2. 6910 So Rainbow # 105 LV NV 89118

Pending:

All licensing has been applied for and is pending approval from Planning

Operations once approved at 8414 Farm Rd # 130:

Employment for 2 to 3 employees
Office hours are 10am to 6pm Mon-Sat

Proposed location 8414 Farm Rd # 130 is under the required limit of 1,500 sq feet; however, it is located in a Retail Center of a major shopping center. The space at this time provides more than enough room for our needs with room to spare, as you can see by the floor plans. We are excited for the opportunity to add a store and create jobs in this area.

Thanking you in advance for your consideration in this matter.

Should you have any questions, please feel free to contact me at (847) 815-5888.

Sincerely,

Myron Lesser

Justification Letter
For Site Development Permit and Special Use Permit
BJ's Restaurant & Brewhouse
"Centennial Centre"
5881 Centennial Centre Blvd.

October 25, 2010

BJ's Restaurant Operations Company, based in Huntington Beach, CA currently owns and operates 100 premium casual dining restaurants. BJ's currently has four locations in Nevada which are located in Summerlin (10840 West Charleston Road), Henderson (9520 S. Eastern Avenue), Reno (13999 South Virginia), and Sparks (425 Sparks Blvd.). BJ's Restaurants is proposing to construct a new location within the Centennial Centre. The site is known as Pad "N" and is currently a vacant direct parcel. The restaurant will be approximately 8500 square feet, contain seating for approximately 260 guests inside and an additional 48 guests on the patio. The restaurant will feature BJ's extensive menu including our signature deep dish pizza, our famous Pizookie dessert as well as our award winning handcrafted beers. In addition, the menu includes generously portioned salads, appetizers, soups, pastas, entrees and a full bar. The entire menu is served until closing throughout the restaurant, including the bar and patio areas.

The proposed hours of operation for BJ's are the following: 8a.m. until 12:00 midnight Sunday through Thursday and 8a.m. until 1:00 a.m. Friday and Saturday. While typically BJ's does not open as early as 8 a.m. we would like the option to open this early on special occasions and holidays such as Mother's Day. BJ's will employ approximately 240 people and recruiting will be done from the local community. In addition to all required City permits and licenses, BJ's will also secure all necessary State permits and licenses as required for the sale of alcoholic beverages.

BJ's is applying for a Site Development Permit and a Special Use Permit. Prior entitlements were granted to this site for the construction of a 10,000 sq. ft. Tavern. BJ's will operate as a Supper Club and occupy less than 10,000 sq, ft which will provide for a less intensive use.

This project supports the criteria for a **Site Development Permit** as follows:

1. The proposed development is compatible with adjacent development and development in the area, as there currently are similar type uses within the vicinity;
2. The proposed development will be design to be consistent with the General Plan, this Title, the Design Standards Manual, the Landscape, Wall and Buffer Standards, and other duly-adopted city plans, policies and standards;
3. Site access and circulation do not negatively impact adjacent roadways or neighborhood traffic, as BJ's will not be modifying any of the existing roadways;
4. Building and landscape materials are appropriate for the area and for the City. BJ's will design a building and landscape area with materials that are provided within the Development Manual of this Center;

SUP-40121
SDR-40122

5. Building elevations, design characteristics and other architectural and aesthetic features will not be unsightly, undesirable or obnoxious in appearance. They create an orderly and aesthetically pleasing environment; and are harmonious and compatible with development in the
area;
6. Appropriate measures will be taken to secure and protect the public health, safety and general welfare;

The project supports the criteria for a **Special Use Permit** as follows:

1. The proposed use will be conducted in a manner that is harmonious and compatible with existing surrounding land uses, and with future surrounding land uses as projected by the General Plan;
2. The subject site is physically suitable for the type and intensity of land use being proposed;
3. Street or highway facilities providing access to the property are adequate in size to meet the requirements of the proposed use;
4. Approval of the Special Use Permit at the site in question will not be inconsistent with or compromise the public health, safety and welfare or the overall objectives of the General Plan.

Waiver Request from the Centennial Centre Development Standards- for landscaping islands every six parking spaces
BJ's is requesting a waiver for the landscape island and tree requirement for every six parking spaces. The parking lot is existing and it does not meet this requirement nor does the balance of the shopping center (see attached photos).In an effort to alternatively comply, BJ's is proposing a 29% landscaped parcel which exceeds the required 20% open space requirement. All plant materials will be consistent with those being used in the existing center.

Waiver Request from the Centennial Centre Development Standards- for sidewalk and retaining wall within setback
BJ's is requesting that a portion of their sidewalk that leads to their patio and a portion of the associated retaining wall be allowed within the setback area as shown on the plans. There are existing utilities on the pad site that dictate the building placement and thus the slight encroachment. There are existing sidewalks within the setback in other locations within the center.

We appreciate your consideration on these applications. Please let us know if you require any further information.

Dear Mr. Gebeke:

The application seeks approval of an amendment to its Master Sign Plan to allow for the installation of interchangeable/removable on-premise signage on the façade of each of the World Market Center Las Vegas Buildings located within the Las Vegas Centennial Plan.

Applicant is seeking approval to install eleven (11) signs onto the existing buildings. The proposed signs are 180'W x 150'H (2), 150'W x 100'H (2), 150'W x 120'H (2), 150'W x 75'H (1), 300'W x 115'H (1), 300'W x 150'H (1) and 150'W x 53'H (2) and all are made with "3M 3662 Pressure Sensitive Vinyl with 3M Laminate". Applicant contemplates installing the signs immediately upon approval, and first displaying the signs for its January 24-28, 2011 tradeshow event, and refreshing and/or changing the signage for tradeshow events occurring thereafter. The signs will depict only the advertisements of either the property owner, or existing tenants and/or business affiliates of the property owner.

Thank you for your consideration. Should you have any questions or concerns, please do not hesitate to contact me at any time.

Very truly yours,

JUSTIFICATION LETTER

Re: CONTRACT AUTOMOTIVE -PARKING LOT-
APN# 139-36-812-008 0.31 Acres

With this letter we are requesting a waiver of landscape standards on the above mentioned parcel with Zoning District "M". I am the owner of the above mentioned parcel and have been conducting business on the same for the past eighteen (18) years. Using this parcel as a parking lot.

Due to the zoning "M" of this property, I have had no problems whatsoever with having no landscape. Moreover, all of the adjacent parcels in the same area have no landscape per City of Las Vegas requirements.

Importantly, I have secured the support and approval of all of my neighboring parcel owners who have signed a petition in support of my request.

In this economic slow down and with sales on a sharp decline, I am hopeful that I will receive your full support as I am struggling to stay afloat with my business.

I am thankful in advance for your consideration and hopeful that this letter will suffice in resolving this matter, so I can continue with my day to day business schedule.

RE: Justification Letter for Temporary Office Trailers located at 497-499 N. Lamb.

The driving force behind our request to extend the permitting of the two office trailers continues to be that the early 1960's building at 501 N. Lamb, was not designed to accommodate either a membership or a staff as exists today. Since we anticipate relocation elsewhere in the Las Vegas valley, the expenditure to remodel 501 N. Lamb to accommodate the functions now housed in 497 & 499 N. Lamb is impossible to justify. The usage of the trailers continues to be exclusively for staff offices and meetings.

Given that the trailers have been on our property for an extended amount of time, we still maintain they are a temporary solution. We expect to have a clear answer as to relocating our operation within the next two years, which would coincide with a permit for continued temporary usage.

Also, if they are to be considered temporary, we hereby seek a waiver for the additional landscaping along the north property line. Once again the cost of such expenditure for a temporary permit is not easily justified.

Representative

NOTE. MATERIALS, COLORS, AND PATTERNS CREATE A STYLIZED DESERT EXPRESSION. EROSION AND REPETITION ESTABLISH THE PRIMARY INFLUENCES. GRADUAL TONAL TRANSITIONS TAKE PLACE ACROSS THE SIDEWALK FLOOR, REFLECTING THE SUBTLETIES AND NUANCE OF THE DESERT. THIS PLAN SHOWS HOW THE STONE PAVING PATTERN IS APPLIED ACROSS A GENERAL BLOCK OF THE PROMENADE. ZONES A, B, AND C ARE LAID OUT ACROSS ALL BLOCKS OF THE PROMENADE BY FINDING THE MIDPOINT AND 3/4 POINT OF EACH BLOCK. TRANSITIONS BETWEEN ZONES A, B, AND C SHOULD BE BLENDED AND SOFT. Re: **Reynolds Discovery Children's Museum Parking Garage**
Design Development Submission,
Submitted and presented October 8, 2010

Dear Mr. Edwards,

The Symphony Park Design Review Committee (SP-DRC) received your submission and presentation of the Reynolds Discovery Children's Museum (Museum) Garage on Friday October 8 and gave you a number of initial comments that day. We will reiterate those comments here to document them. We have, in addition, looked at our submittal requirements more closely and want to pass on a few additional items that we did not necessarily discuss last Friday the 8th in person with your team. We understand and appreciate that you are in the process of refining the garage design to reflect our comments last week but these additional items need to be considered also.

A. SP-DRC comments from October 8 meeting:

1. Reorient the garage plan so that the entry/ exit moves to the West Clark Ave. frontage to reduce conflicts with patron elevator pedestrian traffic and pedestrians along Promenade Place. LV Public Works was consulted to make sure there would not be an automatic veto of this idea since it would put the entry/exit very close to the service exit for the Smith Center service yard. The required parking garage traffic access and circulation study should explore how to clarify the correct entry point for patrons and quantify any conflicts, including operational control of service traffic. It was reiterated that no final design of the service entrance gates have been approved by the SP-DRC and that use of this gate will further help diminish confusion of the parking entry point. This reorientation of the plan might put a sloping floor elevation on the Promenade so the garage team should explore how to make this elevation appear flat floor instead, with horizontal spandrel panels, consistent with the Symphony Park Design Standards (Design Standards) requirement of no sloping floors being expressed along public streets.

2. Add architectural features to the facades (vertical structural or decorative elements to make the elevation more office like and less garage looking). These

RECEIVED
NOV 02 2010

should extend above the top of garage parapet with some simple cap, and might occur every 20 feet or so, at every bay or every other bay. The garage should look as consistent with the Museum architecture as possible, to meet the Design Standards.

3. In the absence of actual required continuous and active retail/restaurant storefronts along the ground floor façade along Promenade Place, it is extremely important to clearly articulate what is being provided in substitution for the waiver request going forward. Please make the Promenade Place elevation display panels continuous across the elevation. Because this solution does not meet the requirements of the Design Standards for continuous retail frontage, the SP-DRC will not be able to approve this solution. It will have to go to City Council for consideration of a waiver.
In addition, the current garage plan is not clear about the condition of pedestrian access to the first level of the garage from Promenade Place, with some open panels and some closed. Please clarify pedestrian access and car front screening. The garage team should consider use of the clipped corner of the building as a pedestrian access point if that fits internal circulation. Also consider more retail-like first floor treatment on the West Clark Ave. frontage, consistent with the Design Standards requirements.

4. Because the garage does not follow the build-to-line along West Clark Ave. it creates an awkward additional streetscape space. Instead of treating this space as a landscape screen for a suburban garage, the team should make the landscape solution more urban, and more of an extension of the streetscape, not so separate from it. Incorporate more of the streetscape plant pallet where ever possible. No decision on the use of Mexican fan palms was discussed. Although some landscape screening of the garage may be desirable, the garage team should explore other ways to achieve this beside the use of palm trees that are not used anywhere else in Symphony Park. The garage team should make something more of the clipped corner opportunity with hardscape such as a small plaza for future cart vendors (provide electrical hook-ups) or pedestrian use.

B. Additional items needed to complete a Design Development Submission:

1. A traffic access and circulation study that looks at access to parking is required. Please provide. See additional comments in point number 1 above. In addition, operations and queuing at ticket booths should be considered given the short distance from the public street.

2. In lieu of a parking study to document the required off street parking needs of the Museum and how the garage might be shared with the Smith Center, the Museum assumed parking demand of 250 spaces is accepted.

RECEIVED
NOV 02 2010

3. The drainage letter provided refers to an updated and more detailed letter with the Design Development submittal but none is provided. Please provide.

4. A LEED expanded check list is required for the garage. The checklist submitted was for the Children's Museum, not the parking garage.

5. There is no lighting information included in this submission. All garage lighting is to be accomplished with cut off luminaires so there is no light spill onto adjacent streets.

6. The canopy proposed along Promenade Place and a short way on West Clark Ave. is positive. To meet the Design Standards it should be raised to a minimum of 16 feet from grade unless its height and design is tied directly to the Museum canopy. This canopy is to be a minimum of 6 feet in depth. According to the Design Standards paragraph 3.14.3 the canopy is also to extend 75% of the length of the West Clark Ave. elevation since this face is on the north side of the street. This canopy, as currently shown on West Clark Ave., is in conflict with proposed planting also shown in this setback space. Since the garage is set back from the build-to-line on this street a canopy this length may not make sense. Therefore a waiver of this standard will be required.

7. Show all proposed utilities on the civil drawings so they can be coordinated with the streetscape design and confirm that they don't interfere with planting locations . Please provide.

8. The streetscape irrigation system controllers and equipment is still shown in the parcel not owned by the Smith Center at West Clark Ave. and City Parkway. Although you provide a note that says if this parcel is developed in the future this equipment will have to be moved it does not commit the Smith Center to providing this relocation. Please clarify your note.

Sincerely,
The Symphony Park Design Review Committee

RE: SP-DRC October 8 Comments Letter dated October 19, 2010
Reynold's Discovery Children's Museum Parking Garage
Martin & Martin Project No.: 2184 2300

Dear Mr. Ayers,

This letter is to address the review comments provided by Steven Van Gorp from the comment letter dated October 19, 2010.

Comment A.1 Reorient the garage plan so that the entry/ exit moves to the West Clark Ave. frontage to reduce conflicts with patron elevator pedestrian traffic and pedestrians along Promenade Place. LV Public Works was consulted to make sure there would not be an automatic veto of this idea since it would put the entry/exit very close to the service exit for the Smith Center service yard. The required parking garage traffic access and circulation study should explore how to clarify the correct entry point for patrons and quantify any conflicts, including operational control of service traffic. It was reiterated that no final design of the service entrance gates have been approved by the SP-DRC and that use of this gate will further help diminish confusion of the parking entry point. This reorientation of the plan might put a sloping floor elevation on the Promenade so the garage team should explore how to make this elevation appear flat floor instead, with horizontal spandrel panels, consistent with the Symphony Park Design Standards (Design Standards) requirement of no sloping floors being expressed along public streets.

Response A.1 **Per item B.1 below, a traffic access and circulation study is in progress.**

The proposed driveway locations are less than forty feet in separation so a non-standard radius for exit/entry driveway radii will be utilized and the area between driveways treated as a median and pulled back from the property line to ensure turning radiuses will work for all vehicles utilizing the site.

Comment B.1 A traffic access and circulation study that looks at access to parking is required. Please provide. See additional comments in point number 1 above. In addition, operations and queuing at ticket booths should be considered given the short distance from the public street.

Response B.1 **A traffic access, circulation study and ticket booth queuing analysis for the Parking Garage site is in progress and it is intended to be submitted prior to the November 5, 2010 SP-DRC committee meeting per conversations with Charles Kubat with recommendations.**

Martin & Martin will utilize the Kimley-Horn Union Park Master Traffic Study and Addendum #1 to be conservative. Mr. Kubat has confirmed an e-mail submittal of the analysis in PDF format may be acceptable for expediency and to provide enough time for review of the analysis prior to the November 5, 2010 DRC meeting.

Comment B.2 In lieu of a parking study to document the required off street parking needs of the Museum and how the garage might be shared with the Smith Center, the Museum assumed parking demand of 250 spaces is accepted.

Response B.2 **Noted, no parking study will be required and the assumed parking demand of 250 spaces is acceptable.**

Comment B.3 The drainage letter provided refers to an updated and more detailed letter with the Design Development submittal but none is provided. Please provide.

Response B.3 **A Drainage Study Update #4 for the Parking Garage was submitted on September 30, 2010 to the Department of Public Works Land Development Services. Comments were received on October 12, 2010 and incorporated into Drainage Study Update #4, Addendum #1 is to be re-submitted the week ending November 5, 2010. Copies of the previously submitted Update, Addendum 1 and grading and detail sheets are attached to show conformance with existing drainage as approved.**

Comment B.7 Show all proposed utilities on the civil drawings so they can be coordinated with the streetscape design and confirm that they don't interfere with planting locations . Please provide.

Re: **Reynolds Discovery Children's Museum Parking Garage**

Design Development Submission comments dated October 19, 2010

Responses to the landscape comments have been included below.

A. SP-DRC comments from October 8th meeting

4. West Clark

- The landscape area was reduced to bring the pedestrian paving and interaction closer to the building façade and adjusted to create a more urban solution.

- Additional Pistache trees have been added to provide additional shade as well as provide partial screening of the garage façade. The trees also provide shaded pedestrian/vendor gathering spaces.

- Italian Cypress will be used at column lines to provide a strong vertical accent and help soften the West Clark façade. When possible, the cypress have been planted in pairs to add more planting mass.

- Small flowering Indian Hawthorn trees have been placed between the cypress pairs to help fill the open parking bays and provide partial screening of the garage interior and cars.

- A trimmed hedge will serve as a buffer at the building foundation while still keeping in the urban spirit. This treatment will also help to discourage pedestrian traffic from passing through these areas.

Corner of West Clark/Promenade Place

- The paving area at the corner of West Clark/Promenade Place was wrapped around the corner architectural feature to provide clear views of any architectural graphics while also providing a plaza space for small gathering or future cart vendors.

- Cypress trees have been placed in raised planters to frame the columnar architectural element. The low 18" high planter walls also will allow for informal seating opportunities.

NOV 02 2010

Promenade Place

- The paving and landscape was adjusted to continue the Promenade Place design with date palms, Palo Verde and paving.

- Small evergreen canopy trees, low hedge and low groundcover was added to architectural planters to help buffer the interior views of the garage.

B. Additional items needed to complete a Design Development Submission

8. The irrigation note was adjusted to show responsibility for relocation of the equipment if necessary. This not will also be included in the final construction documents

Comments
Date: October 28, 2010

Comment:
4. A LEED expanded check list is required for the garage. The checklist submitted was for the Children's Museum, not the parking garage.

Response:
The garage cannot achieve LEED certification by itself because the LEED rating systems do not allow for structures, such as non-occupied parking garages, to be certified. As such, the design team has included the parking garage into the LEED project boundary as an accessory building.

The provided Discovery Children's Museum scorecard includes the anticipated design and construction LEED credits for both the museum and the garage. This combination, as the scorecard illustrates is anticipated to achieve 33 points under LEED for Core & Shell v2.0 for a target of Silver certification. 15 additional credits have been targeted as potential. All anticipated LEED credit requirements will be implemented on both the museum base building and the garage, from building system commissioning to the documentation of regionally extracted and manufactured materials and products. The scorecard on the following pages highlights, in red, the credits that will be applied to the parking garage.

Re: **Parking Garage**
HKS Project No. 12867.001
Planning & Development Justification Letter

Dear Mr. Van Gorp:

The Parking Garage will be built as part of the previously submitted DISCOVERY Children's Museum. It will be located downtown - the geographic center of the Las Vegas valley - as part of the 4.75 acres set aside by the city within the 61-acre parcel of undeveloped land formerly owned by the Union Pacific Railroad called Symphony Park. It is located to the Southeast of the "Spaghetti Bowl", North of Bonneville Avenue across Grand Central Parkway from the World Market Center. Situated at the center of the 61-acre development and part of The Smith Center site, the Parking Garage will contain 337 parking spaces, of which seven (7) will be accessible with four (4) being van accessible. This total number of parking spaces will adequately serve the DISCOVERY Children's Museum's need of 250 parking spaces while the remaining spaces may be used as needed by The Smith Center.

The Parking Garage will be a pay-to-park facility. Visitors to the DISCOVERY Children's Museum and/or The Smith Center can get their parking passes "checked" at the door while others will be required to pay the parking fee. The garage will be available for parking 24 hours a day / 7 days a week.

The Parking Garage is being commissioned in tandem with the DISCOVERY Children's Museum since it cannot achieve LEED certification by itself as the LEED ratings system does not provide for structures, such as a non-occupied parking garage, to be certified. The museum however will meet LEED certification by itself regardless if the garage is not approved. The two are anticipated to achieve a combined total of 33 points under LEED v2.0 for a target of Silver certification. Fifteen additional credits have been targeted as potential. All expected LEED credit requirements will be utilized on both the museum base building and the garage, from the buildings system commissioning to the documentation of regionally extracted and manufactured materials and products. Please see the attached LEED scorecard and credit notes for further clarification.

The Parking Garage Design Team and the Las Vegas Performing Arts Foundation submit the following attached written responses to comments from the SPDRC regarding the Parking Garage Design Development Submittal that was received on October 20, 2010. The responses are supplemented by the attachments to this letter regarding Landscape Architecture, Civil, LEED, and Architectural responses.

Sincerely,

Michael A. Ayer, AIA
