to whom it may concern:

Here this is the last of many notices this Planning Commission Meeting, finally for not opposed to whatever you people do. I'm over my voice would have very little impact on the matter. First of all I have no idea of the location you're talking about, I don't drive and see how it would have the able to oppose to anything that has to do with the city fighting and improvement for the betterment of the city. I live far enough from where all this development is taking place, so the city's development your talking about, it's already built and it would be a big destruction and loss to our city if you get 100% vote against this project if you would have to live it down just because one person disapproval of the project. I would appreciate it very much if you just not send me any more of this notices. First of all I don't have developed large enough to get the answer to send to you and second of all I don't get to the PS every after because I don't drive anymore, therefore it would be impossible to answer your request.

Thank you,
J. E. Howell
