Sustainability: The Parquee TM structures are designed with the latest in LED technology. These displays provide energy efficiencies requiring 36%+ less power than older displays.

Findings: Pursuant to the contract with the City, this project meets/supports existing City regulations whereas this site and surrounding uses are harmonious and compatible.

- a. The proposed digital Parquees™ have an exciting design that complements the City of Las Vegas properties, by emulating the design of the famous “Welcome to Las Vegas” sign originally designed by Yesco. These signs will bring important City information to the public as well as sponsorship opportunities that generate revenue for the City.
- b. The physical site locations for the Parquee™ structures have been preliminary evaluated according to the City maps and zoning restrictions. These sites are determined to be in compliance with the appropriate restrictions.
- c. Street and highway access to the physical site locations is adequate in size to meet the requirements.
- d. The Digital Parquees™ have no impact on public health, safety and welfare.

Thank you for this opportunity. Please let me know if you require any additional information for this special use request.

Sincerely,

Chad McCullough
