Access Ladder - From Ground Level

We are proposing to mount the GPS antenna at the corner of the cinderblock wall, furthest from the fire station broadcast antenna. Based on the existing GPS timing antenna, this will require an antenna run length of approximately 100 feet.

Picture 3 - Existing GPS timing antenna

Picture 4 - Ground

Already mounted to the wall is a GPS timing antenna (*Picture 3*), which was installed by another department at UNR for a seismic sensor. It is our intention to utilize the existing conduit access and equipment cabinet. The run of cable from the GPS timing antenna to the equipment cabinet is 75'.

Picture 5 - PC cabinet

The conduit access from the roof leads to the back wall of this cabinet (*Picture 5*). AC power is available and there is potential for a phone line or Internet access.

Moving the 2 UPS units and removing the second shelf on the right, will give an area of approximately 22" wide by 29" high for a computer to be housed.
