

### Project Scope

Excavate and prep existing site to dig holes and plant 3 Honey Mesquite trees and cover area with Mojave Gold 1/4" decomposed granite material.

### Site Locations

- 1436 Sweeney Ave.
- 1419 Wengert Ave.
- 1436 Wengert Ave.
- 1312 Wengert Ave.
- 1430 Sweeney Ave.

### Volunteers

7 neighborhood residents already committed; will advertise in neighborhood communications collaterals for additional volunteers and solicit area Boy Scout and Girl Scout troops.

### Schedule

Two weeks in fall 2015

BEFORE

AFTER

## Huntridge Neighborhood Association

Melissa Clary,  
President

Elena Pellinen,  
Project Manager and Vice-President

### \$4,600 request; \$3,100 minimum

The maximum request will fund five homes' breezeways and the minimum request will fund three homes' breezeways. Materials delivery fees included in estimate.

## Community Benefits

Mature tree canopy will increase natural shade, respite, beautiful scenery and property values for the neighborhood; will meet City Council's initiatives to add green space to the mature wards.

Lining Huntridge's streets with trees will create an urban trail connection to nearby Huntridge Circle Park and the proposed future regional Spencer Trail alignment.

The low percentage of green space in downtown Las Vegas, as compared to other cities of comparable size, will receive a boost with the trees we plant along pedestrian walkways.

The native desert trees we choose require rare, deep waterings and will help area retain moisture and produce a cooling effect.
