On behalf of our client Wells Fargo, this letter is to serve as a statement of justification for a major amendment to the approved site plan review for the property at 1121 S. Las Vegas Blvd.

Project Description:

Site:

The project site is zoned for commercial use (C-2) and is the location of an existing 4,821 SF Wells Fargo Bank. The original site development review, SD-26-97, for the bank was approved on December the 4th 1997.

Proposed Development:

The purpose of this application is to amend the original site development review to add a 1,044 SF addition to the existing 4,821 SF Wells Fargo Bank. As part of this addition a total of four parking spaces are being removed and the existing electrical service is being relocated. Wells Fargo must continue to provide their services to the community while the addition is being constructed so they will require a temporary generator be located on the site until permanent power is restored to the building.

We feel that this addition will have a minimal impact to the site and while four of the original fifty four parking spaces are lost, twenty spaces will be provided in addition to the required thirty parking spaces. We also feel that the use of the temporary generator will not have a dramatic impact to the site and the surrounding areas.

We respectfully submit the above requests for your consideration. Nadel Architects and Wells Fargo mutually look forward to working with the City of Las Vegas Planning to obtain the necessary approvals and are available at your convenience to answer any questions or to provide additional information.

Respectfully,
NADEL NEVADA, INC
