Re: Update Letter 1 to Drainage Study for Thrive (DS5527).

Mr. Kwon,

CVL hereby submit this letter to the above-mentioned drainage study. This update is needed because the storm drain manhole SDMH#3 moved to the west approximately 30 feet from where it was located in the approved drainage study. The reason for the relocation is that if it was left where it was approved by the original drainage study, when Ann Rd. is built out SDMH#3 would be outside of the pavement area. City of Las Vegas representatives reached out to CVL and requested the relocation so this manhole will be located in the paved area. The hydraulics of the storm drain are not impacted by the relocation of the manhole. CVL respectfully requests this update letter be accepted by CLV.

Should you have any questions of concerns please give me a call at (702) 355-3842.

Sincerely,
CVL Nevada, Inc.
