HISTORIC PRESERVATION COMMISSION MEETING OF: AUGUST 28, 2019

DEPARTMENT: PLANNING

DIRECTOR: ROBERT SUMMERFIELD

HISTORIC PRESERVATION OFFICER: MICHAEL HOWE

Action
 Report

SUBJECT:

HPC-77227 – Discussion for possible action regarding an application for a Certificate of Appropriateness for roof solar panels at 801 Park Paseo (APN 162-03-511-021), R-1 (Single Family Residential) Zone, Ward 3 (Diaz).

PURPOSE:

The applicant is requesting approval of roof solar panels facing the public right-of-way.

BACKGROUND:

03/19/2003 The City Council approved a request to designate parcels of land as a historic district in the City of Las Vegas generally bound by Park Paseo in the north, Ninth Street in the east, Franklin Avenue in the south, and Fifth Place in the west (DIR-1208). Planning Commission recommended approval.

FINDINGS:

The following shall be used and considered by the Commission in their review of the application for a Certificate of Appropriateness:

Per City of Las Vegas Title 19.10.150 (K):

4. The approval authority shall consider the application with reference to the objectives of this Section. The approval authority may deny an application upon determining any of the following:
 - a. That proposed work on any portion of an Historic Landmark, District, Site, Building, Structure or Object will not be compatible with the recognized distinctive character of the overall Historic Landmark, District, Site, Building, Structure or Object.
 - b. That proposed work on any portion of a contributing Historic Landmark, District, Site, Building, Structure or Object within an Historic District will not be compatible with the recognized distinctive character of the Historic Landmark, District, Site, Building, Structure or Object itself, with the character of the entire District, or with the Design Guidelines that have been adopted for the District.
 - c. That major new construction proposed for non-contributing Historic

City of Las Vegas

Landmarks, Districts, Sites, Buildings, Structures or Objects within an Historic District will not be compatible with the recognized distinctive character of the entire District or with the Design Guidelines that have been adopted for the District. For purposes of this Subparagraph, new construction is “major” if such construction equals or exceeds 25 percent of the land area of a parcel without a building or of the building ground floor area of a parcel with a building, at the time of the property’s identification as non-contributing.

- e. That, in cases where Federal funds, in the form of grants, tax incentives or other programs, are to be employed, directly or indirectly, in financing the proposed work, the work will not comply with the Standards for the Treatment of Historic Properties, as promulgated by the U.S. Secretary of the Interior.
5. The approval authority may approve, conditionally approve or deny an application, or continue consideration thereof for further study. The HPO shall provide the applicant with notice of action taken, along with an explanation of any reasons therefore and conditions attached thereto.
6. An approval pursuant to this Subsection shall be valid for a period of one year, unless otherwise specified in the approval.

Additionally, the following general guidelines are taken from the John S. Park Design Guidelines:

1. **The front entrance door of any property shall not be relocated to any façade not considered the front façade.** For this purpose, the front façade of any residential property is defined as that which faces the street; or, the side of the house which was originally constructed as the front façade with a front entrance door.
2. **All original architectural details must be maintained as originally constructed.** Key historic architectural details include, but are not limited to: eave and cornice details, door surrounds, brackets, porch supports and roofs, half-timbering, vergeboards, etc. shall be maintained as originally constructed.
3. **All original windows on the front façade (or any that can be viewed from the street), shall not be replaced.** Historic windows must be repaired if possible. If windows are irreparably damaged, they must be replaced with like windows.
4. **Roof massing shall be maintained as originally constructed.** This includes but is not limited to any roof element that may contribute to the shape and form of roof such as pitch, type (gable vs. hipped), porch roofs, bay window roofs, cupolas, dormers, chimneys, shingles, direction and pitch of gables, etc.

City of Las Vegas

5. **Exterior materials shall be maintained as originally constructed, or shall be replaced with a material compatible with the period of significance as defined in the nomination report.** Appropriate materials include, but are not limited to: brick, stucco, wood (for porch construction and faux half-timbers on Tudor and Neo-Tudor style homes). Homes with vinyl and aluminum siding were not rejected as contributing based on the siding alone because of the popularity of vinyl siding during the period of significance (1931-1952).
6. **Roof materials shall be maintained as originally constructed, or shall be replaced with a material compatible with the style of the house.** For instance, almost all of the homes were originally constructed with wood shingles which are no longer allowable under current building codes. Because of this, vinyl composition shingles are an appropriate and affordable substitution. A somewhat less affordable substitution is stamped metal shingles made to look like wood shingles. Spanish style tiles are considered an appropriate roof material only if the home is Spanish style (rare in the John S. Park Neighborhood Historic District).
7. **Landscaping shall maintain and unify the traditional appearance of the original residential neighborhood, provide shade and visual amenities to pedestrians and others traveling through the area, while supporting City of Las Vegas recommendations for drought tolerant landscaping:**
 - a. No more than 25% of the entire front yard landscape area shall be turf. A water efficient turf such as Fescue blend or hybridized blend is the recommended material.
 - b. There are no restrictions on artificial turf.
 - c. No more than 25% of the entire landscape area may be planted with shrubs and/or accent grass material. Selection of plant materials should be based on their year round interest, with consideration given to spring flowering, branching patterns, plant form, texture, and shape. Plant material shall be drought-tolerant and shall be maintained in excellent health and appearance at all times.
 - d. At least one twenty-four inch box tree shall be planted within the yard for each 750 square feet of landscape area. Trees should be tolerant to urban conditions as well as resistant to diseases and insect infestation. Deciduous trees that will grow to form a large canopy are recommended. Refer to Desert Demonstration Gardens at the Las Vegas Springs Preserve or the tree guide, "Trees for Tomorrow," for examples.
 - e. In order to avoid over watering, a sub-surface irrigation system is encouraged for the lawn area. However, a drip irrigation system is required for the shrubs/accent plants and trees.

The subject site is located within the John S. Park Neighborhood Historic District, which is listed both locally and nationally. The subject property was determined to be a contributing resource to the district. The John S. Park Design Guidelines are silent on solar panel installations.

City of Las Vegas

The proposed solar panels as shown on the site plan would be placed on the west, south, and east facings of the roof. Those on the west and south sides would be facing the public right-of-way.

Staff finds that the proposed solar panels are not in conflict with the John S. Park Design Guidelines; therefore, staff recommends approval of the Certificate of Appropriateness.

RECOMMENDATION:

Staff recommends APPROVAL.

 - a. ***"Las Vegas was founded as a city on May 15, 1905,*** when 110 acres of land situated between Stewart Avenue on the north, Garces Avenue to the south, Main Street to the west, and Fifth Street (Las Vegas Boulevard) to the east, were auctioned off by the railroad company. The completion of the San Pedro, Los Angeles & Salt Lake

Railroad, linking Southern California with Salt Lake City, established Las Vegas as a railroad town. The availability of water made Las Vegas an ideal refueling point and rest stop. **J. T. McWilliams laid out his Original Las Vegas Townsite (now Historic West Las Vegas) on what is now the west side of the railroad tracks.”**

- i. For example, two suggested updates to the above paragraph.
 1. Suggested update- First sentence in bold to read Las Vegas was founded as a ‘community.’
 2. Suggested updates –Last sentence in bold.
Update would create separate paragraph for McWilliams townsite. Southern Nevada surveyor J.T. McWilliams began selling lots in December of 1904 in what he called at the time the “Original Las Vegas Townsite. McWilliams townsite is located between Bonanza on the south and Washington on the north, A Street (Now I-15) on east and H Street on west.
