## Drainage Study Approval Letter

**Date:** February 6, 2024  
**Firm:** Commercial Development Resources  
**Engineer:** Royce A. Eklund, P.E.  
**Address:** 695 Town Center Drive, Suite 110, Costa Mesa, CA 92626  
**Phone:** (949) 610-8997  
**Fax:**  
**E-mail:** reklund@cdrwest.com

**Subject:** Technical Drainage Study for Lazy Days RV  
**Location:** SWC of Sahara Avenue and Atlantic Street  
**APN:** 162-12-101-004, -005, -006, -010  
**Sec, Township, Range:** S12, T21S, R61E  
**Flood Zone & Panel:** Zone X, 2190F, Dated November 16, 2011  
**Application Number:** pw23-16944

Submittals	Date Received	Date Returned	Reviewer	Miscellaneous
Technical	09/19/2023	10/03/2023	WG	
Addendum #1	11/14/2023	12/04/2023	WG	
Addendum #2	01/25/2024	02/06/2024	WG	

Concurrence Required: (Must be obtained prior to permit issuance)		Reason Concurrence is Required
	Boulder City	Adjacent to or Impacts Jurisdiction
	City of Mesquite	Adjacent to or Impacts Jurisdiction
	City of Henderson	Adjacent to or Impacts Jurisdiction
X	City of Las Vegas	Adjacent to or Impacts Jurisdiction
	City of North Las Vegas	Adjacent to or Impacts Jurisdiction
	Nevada Department of Transportation	Adjacent to or Impacts NDOT Facility
	Union Pacific Rail Road	Adjacent to or Impacts a UPRR Facility
	US Army Corps of Engineers	Impacts a USACE Facility
X	Clark County Regional Flood Control District	Regional Significance, Adjacent to or Impacts CCRFCD MPU Facility or in a SFHA

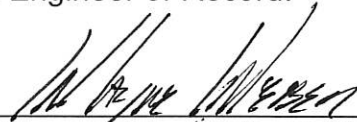

**Additional Conditions:**

1. It should be noted that the project chose to use the most conservative flow for Sahara. The MPU flow of 3952 cfs (BHSA 0026) was analyzed as the existing condition flow within cross sections adjacent to the site including ROW and the inundation area beyond, based on the actual elevations and onsite proposed elevations. There is an existing 60-inch RCP in Sahara with numerous drop inlets that was not included in the analysis to reduce the flow. It should be noted that this worst case MPU flow is not actually in Sahara as the upstream MPU facility's that convey this flow are not entirely constructed yet. This existing condition flow depth is shown to be below the FF elevation at the high side of the building. Proposed water proofing along the north and west corner of the building will be provided for additional flood protection freeboard.
2. Any improvements not depicted on the above mentioned grading plans may require an Update to this Technical Drainage Study.

The County's review is solely based on the information submitted by the Engineer of Record. The County's review is strictly limited to compliance with minimum County Codes and Standards. The Engineer of Record is responsible for researching and addressing situations that may require designs above and beyond the minimum codes for issues of public safety and impacts to upstream, downstream and adjacent properties. The County assumes no liability for information data, designs or conclusions of the Engineer of Record.

The referenced **Technical Drainage Study** has been reviewed and is accepted as complying with minimum improvement standards. As set forth in the subject drainage study, the following measures will be taken to mitigate flood hazards.

The site shall be graded with respect to drainage as shown on "Lazydays – Las Vegas", grading plan sheets 1, 4, 5, 6, 7, 8, 9, 11, 12, 13, 14, 15 of 15, signed and sealed by Royce A. Eklund, P.E., on January 15, 2024.

**Check appropriate conditions**

X	Retaining/screen wall combination may be in excess of current <b>Clark County Unified Development Code, Chapter 30.64.050</b> .
	A FEMA Elevation Certificate, completed by a licensed surveyor, must be submitted to and approved by CCPW Development Review Plan Check prior to the issuance of Certificates of Occupancy for those structures.
X	Mylars of the grading plan must be submitted to the CCPW Development Review Plan Check for approval signatures prior to map recordation (residential) or permit issuance (commercial).
X	An administrative variance to allow the finished floor elevation(s) to be set below the current Clark County criteria must be approved. The finished floor variance must be submitted to CCPW Development Review front counter after drainage study approval and prior to offsite final review.
X	The grading plan will be reviewed by the Building Office Operations Division to ensure compliance with the ADA access requirements. Revisions to the grading plan may be required if the site accessibility design does not comply with the requirements set forth in the Accessibility Chapter of the Clark County Building Code.
	The plans show work is proposed on another property. Notarized written permission must be obtained <b>prior to</b> plan approval. A grading permit must be obtained from Building Dept prior to grading.
X	Right-of-way dedication must be verified.
	Any previously approved drainage easements that are not being used must be vacated.
	Per <i>Regional Flood Control District Policies and Procedures Manual, Section VIII. D. 13. Uniform Regulations for the Control of Drainage</i> , the Engineer of Record shall provide As-Built plans or record drawings to the District after completion and final inspection of such privately installed flood control facilities that have regional flood control significance.
	Structural calculations are required. The structural calculations, plans, and details must be approved prior to "Offsite" submittal and prior to CCRFCD submittal, if applicable.
X	Plan revisions can be found on the red-lined plans and must be addressed.
X	Prepare drainage easement documents as shown on the grading plans.
