TOTAL FEES (LDDRS):				\$1,500.00	----

REMARKS:

6th Submittal: Update #3 to support the lots, roadway and drainage easement modifications through an existing Nevada Energy Easement (NVE) corridor within the Phase 2 plan set to comply with NVE requirements.

The Drainage Study for the subject project has been reviewed and:

	is approved subject to conformance to all City standards and the following conditions:
X	must be resubmitted or supplemented including the following:
	is conditionally approved subject to Clark County Regional Flood Control District concurrence.
	is conditionally approved subject to Clark County Public Works Department concurrence.

Sheet G-11, Drainage Easement Modifications:

1. Label Document Number or Book and Page Number for all Public Drainage easements on the grading plan.
2. It appears that the riprap & earthen ditch encroach into the NVE Easement. Provide documentation that this is acceptable to Nevada Energy Company prior to the approval of the subject drainage study. Explain who will maintain the channel/ditch since it is outside of the subject development.
3. Explain why CLV concrete lined channel requirement is not allowed on NVE easements. Note that the proposed channel drains water on public street (Nightly Shine PI).
4. Provide elevation tags at the connection point of earthen ditch and curb & gutter at the cul-de-sac of Nightly Shine Place.

NOTE: Any future changes to the proposed design (or design assumptions) as outlined in the approved drainage study and attached preliminary grading plan which affect drainage must be addressed in a Drainage Study Update and accepted by the *City of Las Vegas Flood Control Section*. Additionally, final approval of a drainage study is valid for a period of one (1) year. If the proposed construction has not been completed in that time period, the *City of Las Vegas* reserves the right to require additional conditions and/or submission and acceptance of a complete drainage study update prior to further construction of a project.

NOTE: Please be advised that all land surface area disturbances over 1 acre or any area adjacent to a water way must submit to the Nevada Division of Environmental Protection a "Notice of Intent" to discharge that certifies a stormwater pollution prevention plan has been developed and is maintained on site; for inclusion in the Stormwater General Permit No. NVR100000. A phased construction unit in a contiguous subdivision is considered under construction until all stripped or disturbed surface areas have been covered by paving, building construction or planting. For more information, including forms and applications see <http://ndep.nv.gov/bwpc/storm01.htm> or call (775) 687-9429.

***** The City of Las Vegas Flood Control is standardizing the file naming of drainage studies and plans during the digitizing process. When saving the project files in the CD or thumb drive, please follow the system below:**

If drainage study only contains one combined file, use the following naming convention in Document Title:

- 1st Submittal DS and Plans (for first and original submittal);
- 2nd Submittal DS and Plans (for second submittal (addendum #1)) etc.

If drainage study contains multiple files, use the following naming convention in Document Title:

- 1st Submittal DS (for the report of the drainage study)
- 1st Submittal Plan 1 (could be the drainage condition maps)
- 1st Submittal Plan 2 (could be the improvement plans) etc.

END OF REMARKS
