**RE: 26-0149-SDR1
CITY COUNCIL MEETING OF JULY 1, 2026**

Dear Applicant:

The City Council at a regular meeting held on **July 1, 2026** voted to **APPROVE** the following Land Use Entitlement project request FOR A MAJOR AMENDMENT TO AN APPROVED SITE DEVELOPMENT PLAN REVIEW [Z-0086-99(1)] FOR THE PROPOSED ADDITION OF THREE, ONE-STORY MODULAR BUILDINGS AND PARKING LOT RECONFIGURATION at 2900 North Torrey Pines Drive (APNs Multiple), C-V (Civic) Zone, Ward 5 (Summers-Armstrong). The Planning Commission (6-0-1 vote) and Staff recommend APPROVAL.

This approval is subject to the following conditions:

Planning

1. Conformance to the Conditions of Approval for Site Development Plan Review [Z-0086-99(1)] shall be required, except as amended herein.
2. This approval shall be void two years from the date of final approval, unless exercised pursuant to the provisions of LVMC Title 19.16. An Extension of Time may be filed for consideration by the City of Las Vegas.
3. All development shall be in conformance with the site plan, date stamped 04/08/26, landscape plan date stamped 04/01/26, and building elevations, date stamped 05/11/26, except as amended by conditions herein.
4. All necessary building permits shall be obtained and final inspections shall be completed in compliance with Title 19 and all codes as required by the Building and Safety Division.

5. These Conditions of Approval shall be affixed to the cover sheet of any plan set submitted for building permit.
6. The applicant shall coordinate with the City Surveyor and other city staff to determine the most appropriate mapping action necessary to consolidate the existing lots. If a mapping action is required, the mapping action shall be completed and recorded prior to, or concurrent with, the issuance of any building permits.
7. Prior to the exercising of the Site Development Plan Review as expressed in Title 19.16.100(J), the Developer shall be required to record a Declaration of Private Maintenance Requirements ("DPMR") as a covenant on all associated properties and on behalf of all current and future property owners. The DPMR shall include a listing of all privately owned and/or maintained infrastructure improvements, along with assignment of maintenance responsibility for each of the subject site's landscaped areas including, but not limited to, perimeter landscape buffers, parking lot landscaping, and foundation landscaping, and shall provide a brief description of the required level of maintenance for privately maintained components including, but not limited to, building elevations, parking lot striping, trash enclosures and driveway pans. The DPMR shall be reviewed and approved by the City of Las Vegas Department of Community Development prior to the exercising of the Site Development Plan Review as expressed in Title 19.16.100(J) and must include a statement that all properties within the subject site are subject to assessment for all associated costs should private maintenance obligations not be met, and the City of Las Vegas be required to provide for said maintenance. Following recordation, the Developer shall submit a copy of the recorded DPMR document to the City of Las Vegas Department of Community Development.
8. Trash enclosures shall be provided in conformance with the provisions of Title 19.08.040.E.
9. A technical landscape plan, signed and sealed by a Registered Architect, Landscape Architect, Residential Designer or Civil Engineer, must be submitted prior to or at the same time application is made for a building permit. A permanent underground sprinkler system is required, which shall be permanently maintained in a satisfactory manner; the landscape plan shall include irrigation specifications. Installed landscaping shall not impede visibility of any traffic control device.
10. Prior to or at the time of submittal for any building permit, the applicant shall provide written verification by the Federal Aviation Administration (FAA), the Clark County Department of Aviation, or both, of the following:
 - a. Applicant is required to file a valid FAA Form 7460-1, "Notice of Proposed Construction or Alteration" with the FAA.

- b. Applicant is advised that FAA's airspace determinations (the outcome of filing the FAA Form 7460-1) are dependent on petitions by any interested party and the height that will not present a hazard as determined by the FAA may change based on these comments. Applicant is advised that the FAA's airspace determinations include expiration dates and that separate airspace determinations will be needed for construction cranes or other temporary equipment.
 - c. No building permits should be issued until the applicant provides evidence that a "Determination of No Hazard to Air Navigation" has been issued by the FAA. The Determination of No Hazard must not be expired.
 - d. No structure greater than 35 feet in height shall be permitted to be erected or altered that would constitute a hazard to air navigation or would result in an increase to minimum flight altitudes during any phase of flight or would otherwise be determined to pose a significant adverse impact on airport or aircraft operations.
11. All City Code requirements and design standards of all City Departments must be satisfied, except as modified herein.

Public Works

12. Prior to the submittal of any construction drawings, contact the Sanitary Sewer Engineering Section of the Department of Public Works to discuss acceptable locations for grease interceptors and points of connection to the public sewer. Each parcel shall have its own private lateral connection to Public Sewer per CLV UDC 19.02.080.B.
13. Queues for the overall site shall not extend into the public right-of-way as a result of the pick-up and drop-off operations of this site.
14. All landscaping and private improvements installed with this project shall be situated and maintained so as to not create sight visibility obstructions for vehicular traffic at all development access drives and abutting street intersections.
15. A Drainage Plan and Technical Drainage Study must be submitted to and approved by the Department of Public Works prior to the issuance of any building or grading permits or submittal of any construction drawings, whichever may occur first. Provide and improve all drainageways recommended in the approved drainage plan/study including any necessary Public Drainage Easements. The developer of this site shall be responsible to construct such neighborhood or local drainage facility improvements as are recommended by the City of Las Vegas Neighborhood Drainage Studies and approved Drainage Plan/Study concurrent with development of this site.

Fire & Rescue

16. A fully operational fire protection system, including fire apparatus roads, fire hydrants and water supply, shall be installed and shall be functioning prior to construction of any combustible structures.

The Notice of Final Action was filed with the Las Vegas City Clerk on **July 2, 2026**.

Sincerely,

Seth T. Floyd
Director of Community Development
Department of Planning
